

2011

annual progress report

Lightweighting Materials

This document highlights work sponsored by agencies of the U.S. Government. Neither the U.S. Government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the U.S. Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the U.S. Government or any agency thereof.

Contents

A. Acronyms and Abbreviations

Acronyms and Abbreviations.....	A-1
---------------------------------	-----

1. Introduction

Introduction.....	1-1
-------------------	-----

2. Automotive Metals

A. Processing and Manufacturability - Oak Ridge National Laboratory.....	2-1
B. Processing and Manufacturability - Pacific Northwest National Laboratory.....	2-10
C. Production of Primary Magnesium - Solid Oxide Membrane Electrolysis of Magnesium: Scale-Up Research and Engineering for Light-Weight Vehicles - Metal Oxygen Separation Technologies, Inc.....	2-37
D. Modeling and Computational Materials - Oak Ridge National Laboratory.....	2-51
E. Modeling and Computational Materials - Pacific Northwest National Laboratory.....	2-59
F. Southern Regional Center for Lightweight Innovative Design - Mississippi State University.....	2-69
G. Multi-Material Enabling - Oak Ridge National Laboratory.....	2-99
H. Multi-Material Enabling - Pacific Northwest National Laboratory.....	2-120
I. Advanced High Strength Steel: Multi-Scale Modeling of Deformation Mechanism for Design of New Generation of Steels.....	2-130
J. Advanced High Strength Steel: Development of Novel Finite Element Simulation Tools That Implement Crystal Plasticity Constitutive Theories Using An Efficient Spectral Framework.....	2-136
K. Development of Nano-Acicular Duplex Steels.....	2-143
L. Sheet Formability and Springback of Advanced High Strength Steels - The Ohio State University.....	2-149

3. Polymer Composites

A. Polymer Composite Development - Oak Ridge National Laboratory.....	3-1
B. Low Cost Carbon Fiber Development - Oak Ridge National Laboratory.....	3-13
C. Carbon Fiber Technology Facility.....	3-42

4. USAMP Cooperative Research

A. Automotive Composites Consortium.....	4-1
B. Automotive Metals Division - U.S. Automotive Materials Partnership.....	4-15
C. Auto/Steel Partnership - U.S. Automotive Materials Partnership.....	4-40
D. Nondestructive Evaluation Steering Committee - U.S. Automotive Materials Partnership.....	4-72

5. Crosscutting

A. Cost Modeling - Oak Ridge National Laboratory.....	5-1
B. Safety Data and Analysis - Lawrence Berkeley National Laboratory.....	5-10
