SUPPLEMENTARY INFORMATION:

Background

On December 17, 2014, DOE published a notice of proposed rulemaking (NOPR) in the **Federal Register** (79 FR 75076) in which it proposed regulations under section 934 of EISA to establish a retrospective risk pooling program whereby, in the event of certain nuclear incidents,

nuclear suppliers would pay for any contribution by the United States government to the international supplementary fund created by the Convention on Supplementary Compensation for Nuclear Damage (CSC). On August 3, 2016, DOE published in the **Federal Register** a notice and request for comments (81 FR 51193) on a proposed collection of information that it is developing in connection with the NOPR for submission to the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1995. The notice stated that comments regarding the proposed information collection were to be submitted by October 3, 2016. Also on August 3, 2016, DOE published in the **Federal Register** a notice of a public workshop (81 FR 51140) to discuss the proposed information collection. At the workshop held on September 16, 2016, several entities commented requesting additional time in which to submit further comments on issues raised at the workshop and in comments submitted in advance of the workshop. After the workshop, one commenter submitted a written request for an extension of the public comment period, until at least November 3, 2016. In response to public comment, DOE has determined that the request for an extension of time should be granted, and the public comment period will close on November 7, 2016.
