

NEPA Categorical Exclusion Determination Form

Program or Field Office: U.S. Department of Energy (DOE) Office of Legacy Management (LM)

Project Title: Install and Maintain Aerial Survey Monuments and Perform Aerial Surveys

Location: Green River, Utah, Disposal Site

Proposed Action or Project Description:

DOE LM is proposing to install aerial survey monuments for aerial survey activities at the Green River, Utah, Uranium Mill Tailings Radiation Control Act Title I Disposal Site. Aerial survey monuments would be constructed at four proposed locations adjacent to the engineered disposal cell to provide reliable control points for future aerial surveys.

Proposed work would include ground surveying and the placement of survey pins at all locations. All aerial survey monuments would be located beyond the extent of the disposal cell. A skid-steer, loader, track hoe, or backhoe would be used to dig holes to construct the monuments. Efforts would be made to minimize areas of land disturbance during monument construction. Aerial surveys would be expected to be conducted by unmanned aerial vehicles (also called drones). The survey data would facilitate the long-term management of the site. Ongoing maintenance of the aerial survey monuments would be performed in out years, as needed. The survey monument construction work would be scheduled for August 2020.

Performance of aerial remote-sensing surveys would occur on an as-needed basis. No aviation activities would commence until required Flight Safety Plans are approved by a certified DOE aviation manager and permission is received from LM to proceed with aviation activities. The need to perform follow up surveys would depend, in part, upon results of the baseline surveys. Follow up surveys would require new Flight Safety Plans approved by a certified DOE aviation manager. All proposed work would be conducted by the Legacy Management Support (LMS) contractor or a subcontractor under LMS supervision.

In accordance with the National Historic Preservation Act Section 106 process, LM reviewed the proposed undertaking in consultation with the Utah State Historic Preservation Officer (SHPO). LM determined that there would be no adverse effects to the historic property. LM submitted this determination in writing to the SHPO on June 16, 2020. The Utah SHPO agreed with this determination in writing on July 27, 2020.

Categorical Exclusion(s) Applied:

- B1.3, Routine maintenance
- B3.1, Site characterization and environmental monitoring
- B3.2, Aviation activities

For the complete DOE National Environmental Policy Act (NEPA) regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of Title 10 *Code of Federal Regulations* Section 1021 (10 CFR 1021).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

NEPA Categorical Exclusion Determination Form

- The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized by the LM Director per DOE Policy 451.1), I have determined that the proposed action fits within the specified classes of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
