CX, EA, EIS APPENDIX AND NUMBER:

Description:

- A9** Information gathering (including, but not limited to, literature surveys, inventories, audits), data analysis (including computer modeling), document preparation (such as conceptual design or feasibility studies, analytical energy supply and demand studies), and dissemination (including, but not limited to, document mailings, publication, and distribution; and classroom training and informational programs), but not including site characterization or environmental monitoring.
- A11** Technical advice and planning assistance to international, national, state, and local organizations.
- B5.1** Actions to conserve energy, demonstrate potential energy conservation, and promote energy-efficiency that do not increase the indoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, designers), organizations (such as utilities), and state and local governments. Covered actions include, but are not limited to: programmed lowering of thermostat settings, placement of timers on hot water heaters, installation of solar hot water systems, installation of efficient lighting, improvements in generator efficiency and appliance efficiency ratings, development of energy-efficient manufacturing or industrial practices, and small-scale conservation and renewable energy research and development and pilot projects. The actions could involve building renovations or new structures in commercial, residential, agricultural, or industrial sectors. These actions do not include rulemakings, standard-settings, or proposed DOE legislation.

Rational for determination:

The following Project Activity Sheets (PAS) are bounded by the signed SOW and are therefore categorically excluded under NEPA: #1 Greenhouse Gas Inventory, #3 Residential Energy Audits, #4 Rental Energy Efficiency Retrofit Program, #6 Traffic Signal Retiming, and #7 Renewable Energy Generation - Feasibility Study.

Additionally, PAS #2 Pascal Senior Center Energy Efficiency Project is categorically excluded for the following energy efficiency retrofits: a new reflective EP roof over the flat roof section of the building with three inch ISO insulation; a comprehensive sealing of the whole building including caulking, weather stripping and insulation; replacement of glass doors, skylights and windows; installation of solar hot water heaters; feasibility study of geothermal ground source heat pump systems; and sustainable landscaping.

PAS #8 Administration is categorically excluded.

Any projects submitted for EECBG funding that fall outside the bounds of the signed SOW will require a separate NEPA determination review.
