U.S. DEPARTMENT OF ENERGY
EERE PROJECT MANAGEMENT CENTER
NEPA DETERMINATION

RECIPIENT: TEXAS COMPTROLLER OF PUBLIC ACCOUNTS

STATE: TX

PROJECT TITLE : ARRA SEP CITY OF JONESTOWN WIND PROJECT

Funding Opportunity Announcement Number	Procurement Instrument Number	NEPA Control Number	CID Number
DE-EE0000116			116

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

- A9** Information gathering (including, but not limited to, literature surveys, inventories, audits), data analysis (including computer modeling), document preparation (such as conceptual design or feasibility studies, analytical energy supply and demand studies), and dissemination (including, but not limited to, document mailings, publication, and distribution; and classroom training and informational programs), but not including site characterization or environmental monitoring.
- A11** Technical advice and planning assistance to international, national, state, and local organizations.

Rational for determination:

The State of Texas will provide \$1,836,400 in Recovery Act funds to the City of Jonestown to construct and install up to twenty-five 20-kW wind turbines throughout the surrounding city and area.

Jonestown is a community of about 1250 homes and 54 businesses covering about 5.3 square miles. Seventeen locations have been identified for possible siting of the turbines. Preliminary plans are to surface mount the systems for operation just above the tree line to minimize visual impact. The city has held 2 town meetings to discuss the plans and has a third town meeting scheduled later in April, 2010. Letters have been sent to the Fish and Wildlife Service, Corps of Engineers, and Federal Aviation Administration for information needed to assess project impact on wildlife, wetlands, and air traffic.

At present, the city is still uncertain of the number of turbines it will construct and the exact location for the turbines. Final engineering design, site location, and permitting requirements are still needed. In the meantime, environmental information that will aid in the siting of the turbines is being sought. That information will have to be analyzed and incorporated into the final engineering design and siting considerations.

This project is still in the planning stages and requires significant engineering design and site characterization work before a NEPA determination can be made. Accordingly, the project is to be phased. Phase 1 is to complete the engineering design, site characterization, permitting, and environmental information needed for DOE to make a NEPA determination. Phase 2 is to construct and install the wind turbines building upon the information collected through the engineering, site characterization, and environmental analyses.

Based on information provided by the State and recipient, the project requires further definition before a final NEPA determination can be made. Accordingly, the project is to be phased. Phase 1 is to finalize the engineering, site characterization, permitting, and environmental analyses required for DOE to make a NEPA determination. The phase 1 effort is categorically excluded via A9 and A11. The phase 2 effort will follow through with the construction and installation of the turbines based on the information collected in phase 1. The phase 2 effort may require the preparation of an Environmental Assessment should the information collected in phase 1 so dictate.

NEPA PROVISION

DOE has made a conditional NEPA determination for this award, and funding for certain tasks under this award is contingent upon the final NEPA determination.

Insert the following language in the award:

You are restricted from taking any action using federal funds, which would have an adverse affect on the environment or limit the choice of reasonable alternatives prior to DOE/NNSA providing either a NEPA clearance or a final NEPA decision regarding the project.

Prohibited actions include:

Site preparation, construction, and installation of the wind turbines until a final NEPA determination has been made.

This restriction does not preclude you from:

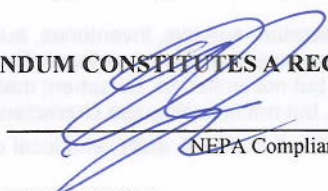

Conducting the engineering, site characterization, and environmental analyses required to prepare final project plans. If you move forward with activities that are not authorized for federal funding by the DOE Contracting Officer in advance of the final NEPA decision, you are doing so at risk of not receiving federal funding and such costs may not be recognized as allowable cost share.

Note to Specialist :

According to the Project Officer, funding needs for the phase 1 effort is about \$100,000. Unless the scope of the phase 1 efforts changes significantly, a change in funding will not affect my determination.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.

FIELD OFFICE MANAGER DETERMINATION

Field Office Manager review required

NCO REQUESTS THE FIELD OFFICE MANAGER REVIEW FOR THE FOLLOWING REASON:

- Proposed action fits within a categorical exclusion but involves a high profile or controversial issue that warrants Field Office Manager's attention.
- Proposed action falls within an EA or EIS category and therefore requires Field Office Manager's review and determination.

BASED ON MY REVIEW I CONCUR WITH THE DETERMINATION OF THE NCO :

Field Office Manager's Signature: _____

Field Office Manager

Date: _____
