Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

**CX, EA, EIS APPENDIX AND NUMBER:**

Description:

**B5.1** Actions to conserve energy, demonstrate potential energy conservation, and promote energy-efficiency that do not increase the indoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, designers), organizations (such as utilities), and state and local governments. Covered actions include, but are not limited to: programmed lowering of thermostat settings, placement of timers on hot water heaters, installation of solar hot water systems, installation of efficient lighting, improvements in generator efficiency and appliance efficiency ratings, development of energy-efficient manufacturing or industrial practices, and small-scale conservation and renewable energy research and development and pilot projects. The actions could involve building renovations or new structures in commercial, residential, agricultural, or industrial sectors. These actions do not include rulemakings, standard-settings, or proposed DOE legislation.

**Rational for determination:**

A solar hot water system or solar photovoltaic panels will be installed on about 80 square feet of roof space on the FCPC Administrative Building in downtown Milwaukee, Wisconsin. This installation will be conducted on the same property where other solar photovoltaic panels will be installed in double-stacked racks. The installation of a solar hot water system or solar photovoltaic panels on the roof of the building would not affect any other properties, require disturbing hazardous substances, adversely affect any environmentally sensitive resources, or result in air emissions.
