DATE: June 15, 2011

REPLY TO
ATTN OF: KEC-4

SUBJECT: Environmental Clearance Memorandum

to: David Tripp – TEP-CSB-1

Proposed Action: Noxon Radio Station Upgrade Project

Budget Information: Work Order # 00254987 Task 03

Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021: B1.7 “Acquisition, installation, operation, and removal of communication systems...”

Location: Sanders County, Montana – Section 33, Township 26 North, Range 32 West of the Noxon Rapids Dam Quadrangle

Proposed by: Bonneville Power Administration (BPA)

Description of the Proposed Action: BPA proposes to replace the existing building at Noxon Radio Station with a new 650 square foot building. The existing building, especially the floor, is deteriorating and presents a safety hazard to both BPA personnel and to the radio station equipment. To accompany the new building, BPA also proposes to install two new 1500 gallon propane tanks, three new underground fiber conduits, a new fiber vault by the new building, and to remove the existing building. To install the fiber conduits, BPA would excavate two 2 foot wide, 3 foot deep, and approximately 175 foot long trenches on a current fiber right-of-way next to the existing fiber conduit runs. In addition, the new vault would require excavation of approximately a 4 foot by 4 foot area and up to 4 feet deep in the proximity of the new building. Additional conduit runs would be made from the existing power pole to the new building to accommodate a power and fiber optics run to the new building.

All construction activities would occur within previously disturbed land that is owned by Avista Corporation. BPA and Avista Corporation have reviewed the proposed action and all land use agreement terms, conditions, and stipulations would be coordinated prior to project implementation.

Findings: BPA has determined that the proposed action complies with Section 1021.410 and Appendix B of Subpart D of the Department of Energy’s (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996). The proposed action does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal. The proposal is not connected [40 C.F.R. 1508.25(a)(1)] to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts [40 C.F.R. 1508.25(a)(2)], and is not precluded by 40 C.F.R. 1506.1 or 10 C.F.R. 1021.211. Moreover, the proposed action would not (i) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, (ii) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities, (iii) disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation and Liability Act-excluded petroleum and natural gas products that pre-exist in the environment such that there would be uncontrolled or unpermitted releases, or (iv) adversely affect environmentally sensitive resources.

Based on a site survey and a detailed cultural resource report produced by a BPA in-house archaeologist covering the proposed area of potential effect, it was determined that no adverse effects to cultural resources would occur by this project. The cultural resource report and a summary letter were sent on June 1, 2011 to the Montana State Historical Society, the Avista Corporation, the Confederated Salish and Kootenai Tribes (CSKT) and the Coeur D'Alene Tribe. A concurrence letter was received on June 14, 2011 from the Montana State Historical Society regarding this cultural resource report. Concurrence was also received from the CSKT on June 14, 2011 via a phone conversation with a BPA archaeologist and through a letter that outlined the necessary construction provisions. Provisions include the presence of an on-site cultural monitor if excavation occurs beyond a previously disturbed area (see the attached provisions). In addition, on June 14, 2011 and June 15, 2011 BPA coordinated with Avista's environmental personnel to ensure all of Avista's requirements and responsibilities have been met. It was determined Avista had properly coordinated with both the Montana State Historical Society and the above mentioned tribes.

The project area is absent of water features, unique wildlife habitat, or other environmentally sensitive resources. Because of the previous disturbance and lack of habitat, no ESA species listed or proposed for listing are likely to be present. There would also be no effect to floodplains or wetlands. It was therefore determined that no adverse environmental effects would occur from construction of the project.

Based on the provisions identified on the attachment below this proposed action meets the requirements for the categorical exclusion referenced above. We therefore determine that the proposed action may be categorically excluded from further NEPA review and documentation.

Provisions

Environmental Checklist for Categorical Exclusions

Provisions

This categorical exclusion will meet the following provisions:

Cultural Resources:

1. If excavation work extends beyond or below previously excavated areas, a BPA archaeologist as well as an archaeologist from the Confederated Salish and Kootenai Tribes (CSKT) should be contacted prior to disturbing the ground to arrange for an archaeological monitor to observe the construction activities. If it is unclear if the land has been previously disturbed, the BPA and CSKT archaeologists should be consulted with prior to disturbing the ground.
2. Should archaeological materials be unexpectedly encountered during project activities, the following actions should be taken:
 - Stop work and immediately notify the COTR or site manager and a qualified archaeologist. In addition, all concerned Tribes and appropriate federal, state, and local agencies should be notified.
 - Implement reasonable measures to protect the discovery site, including any appropriate stabilization or covering.
 - Take reasonable steps to restrict access to the site of discovery.
 - Take reasonable steps to ensure the confidentiality of the discovery site.

Vegetation Protection and Noxious Weeds:

3. Restrict construction activities to the area needed to work effectively. Construction crews will be instructed to restrict vehicles to designated areas and existing roads as much as possible.
4. Designated areas will be used to store equipment and supplies. The contractor will follow applicable state and federal regulations to protect plant communities.
5. After construction, disturbed areas not needed for ongoing access or maintenance will be promptly reseeded with native species where possible.
6. Seed mix for revegetation will contain a mixture of the common native bunchgrasses and dryland species present in the project area.
7. Do not spread noxious weed seeds:
 - Certify in writing that all vehicles, equipment, and machinery are free of all weeds including seeds before moving the equipment into the construction area. The COTR or site manager will inspect vehicles prior to bringing them on site.
 - When an area contaminated by weeds is encountered on, or off of, the construction site, use caution to prevent the spreading of weeds to other areas. This may include cleaning the equipment with high-pressure water prior to moving from one work site to another, or installing wheel washes. Notify the COTR or site manager as to the location of the noxious weeds.
8. Use only weed-free materials, or inert materials for mulching and for erosion control.

Erosion Control and Land Use:

9. Require dust abatement on road and construction site, if necessary.

10. Appropriate erosion and sediment control best management practices will be utilized for the protection of water resources.
11. Provide a schedule of construction activities to all landowners/agencies along the corridor that could be affected by construction.
12. Keep gates in as found condition (opened or closed). Coordinate construction sequence with landowner so that livestock may be moved if necessary.

Public Health and Safety:

13. Limit construction to daytime hours for noise abatement.
14. No equipment with un-muffled exhaust is allowed. Fit all equipment with sound-control devices that are as effective as the original equipment.
15. Should contaminated media be unexpectedly encountered during construction of the project, stop work and notify the COTR. Contaminated media include materials that are potentially harmful to the environment or human health and safety. Work will proceed only after measures approved by the state and local regulatory agencies are put in place to prevent the spread of contaminated materials and protect the health and safety of workers.
16. Equip vehicles with fire suppression equipment, including a shovel, fire extinguisher, and bladder or water supply.
17. Equip construction vehicles with spill containment kits able to respond to construction related spills.

Environmental Checklist for Categorical Exclusions

Name of Proposed Project: Noxon Radio Station Upgrade Project

Work Order #: 254987

This project has been found to not adversely affect the following environmentally sensitive resources, laws, and regulations:

Environmental Resources	No Adverse Effect	No Adverse Effect With Conditions
1. Cultural Resources If excavation work extends beyond or below previously excavated areas, a BPA archaeologist as well as an archaeologist from the Confederated Salish and Kootenai Tribes (CSKT) should be contacted prior to disturbing the ground to arrange for an archaeological monitor to observe the construction activities. If it is unclear if the land has been previously disturbed, the BPA and CSKT archaeologists should be consulted with prior to disturbing the ground.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. T & E Species, or their habitat(s)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Floodplains or wetlands	<input checked="" type="checkbox"/>	<input type="checkbox"/>
4. Areas of special designation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
5. Health & safety	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6. Prime agricultural lands	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7. Special sources of water	<input checked="" type="checkbox"/>	<input type="checkbox"/>
8. Consistency with state and local laws and regulations	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9. Pollution control at Federal facilities	<input checked="" type="checkbox"/>	<input type="checkbox"/>
10. Other	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Note: Supporting documentation is in the Project file.
