## Categorical Exclusion Determination Form

**Proposed Action Title:** CATEGORICAL EXCLUSION (CX) DETERMINATION FOR DIKE CONSTRUCTION AND MODIFICATIONS (CX-GEN-006)

**Program or Field Office:** Oak Ridge Office, Oak Ridge, Tennessee

**Location(s) (City/County/State):** Oak Ridge, TN; Berkeley, CA; Menlo Park, CA; Newport News, VA; and other DOE-operated facilities and ancillary areas associated with these sites, programs, and projects

**Proposed Action Description:**

The proposed actions would involve construction or modification of new or existing secondary containment structures such as dikes, berms, curbing, diversion structures, weirs, booms, and other barriers which would meet the requirements for secondary containment, as specified in 40 CFR Part 112.7(c), to prevent accidental discharges from reaching navigable water courses. The actions taken would include, but would not be limited to, the following types of actions: excavation of dirt, clay, gravel, rock, etc.; pouring and/or forming of concrete; demolition of existing dikes, berms, curbing, etc.; application of coatings, sealants, or liners to the walls and/or floors of dikes, berms, curbing, etc.; erection of roofs and walls around secondary containment areas; and installation of sump pumps and associated piping.

Any wastes generated would be appropriately characterized and then disposed of in existing permitted/approved facilities. The proposed action would be evaluated before implementation to identify options to reduce or eliminate generation of waste materials.

The proposed dike construction and modification actions that would take place on the Oak Ridge Reservation (ORR) have been reviewed in accordance with the Cultural Resource Management Plan (CRMP) or applicable sections in a ratified Programmatic Agreement document and would not result in an adverse effect to historic properties included or eligible for inclusion in the National Register of Historic Places (National Register). If the proposed ORR actions would have an adverse effect on properties included or eligible for inclusion in the National Register, DOE would consult with the State Historic Preservation Officer (SHPO) and initiate actions specified in procedures set forth in the Advisory Council's regulations in 36 CFR Part 800.

For sites other than the ORR, DOE would follow the Section 106 process and would consult with the respective SHPO, as appropriate.

Should the proposed dike construction and modification actions involve ground disturbances at locations where an archeological survey had not been conducted or take place at previously disturbed locations where the potential exists to exceed the depth of previous ground disturbances, DOE would consult with the SHPO to determine whether an archeological survey is warranted prior to initiating the proposed actions.

To ensure that sensitive resources are protected, existing maps and surveys/studies on threatened and endangered species, wetlands and floodplains, and historically sensitive areas would be used to locate these areas. In addition, personnel responsible for identifying these resources would be consulted and, if warranted, additional surveys and walkovers would be conducted to confirm or update available information.

No known extraordinary circumstances would be associated with these actions that might affect the significance of the environmental effects of the proposed action based on past similar actions. These actions would not be connected to other actions with potentially significant impacts or related to other proposed actions with cumulatively significant impacts; they would meet the conditions that are integral elements of the classes of actions which may be categorically excluded from further National Environmental Policy Act (NEPA) documentation. Should the action not meet the conditions for CX consideration, a separate NEPA document would be prepared and submitted to DOE-ORO for review and approval.

Although an action might fall under the category of "dike construction and modification," a separate NEPA review would be performed and documented should the action or related/cumulative effect of the action have the potential to result in an unusual or significant impact to the environment. In addition, should the proposed action involve Corps of Engineers coordination and review or review under 10 CFR 1022, the action would not proceed until such reviews had been completed.

**Categorical Exclusion(s) Applied:**

B1.6 - Tanks and equipment to control runoff and spills
