Proposed Action Title: Panasonic Boston Laboratory - Low Profile CPV Panel with Sun Tracking for Rooftop Installation

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Newton, MA

Proposed Action Description:

Funding will support the project team's small-scale, research and development activities to develop sun tracking mechanism(s) for microscale concentrated photovoltaic panels (CPV) installed at a fixed tilt (e.g., on a rooftop) that do not tip and tilt the entire PV panel to follow the sun. The proposed activities will include (1) computer design and simulation of microscale CPV optics, mechanical design and simulation of fix-tilt tracking mechanisms, and electronic and software design of control mechanisms; (2) lab prototyping of optical, mechanical, and control designs, including actual performance of fabricated optical components, proof-of-concept test of tracking mechanism and tracking accuracy, and proof-of-concept test of control loop; and (3) actual field test of microscale CPV subpanels with tracking of the sun. If successful, the technology will provide a cost-effective way of expanding CPV technology and products to places previously unavailable to CPV, such as in urban areas with many rooftops that are unsuitable for conventional CPV panels.

Panasonic will comply with applicable local, state, and federal regulations and incorporate appropriate control technologies and best management practices in all project activities. Panasonic is required, under the terms of its ARPA-E Cooperative Agreement, to submit an amended EIQ to ARPA-E identifying the location of proposed outdoor testing. Testing may only proceed after an amended NEPA determination is issued by ARPA-E.

Project activities will be conducted at existing facilities that are designed for the applicable activities, and will be conducted in accordance with applicable Federal, State, and local safety and environmental requirements.

Categorical Exclusion(s) Applied:

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

B5.15 - Small-scale renewable energy research and development and pilot projects

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

NEPA Compliance Officer:
