NASEO would facilitate peer learning among SEOs, assess state needs, assist DOE in engaging states, enhance relevant DOE tools, activities, and resources for the benefit of BTO stakeholders and the general public, and support the integration of advanced technologies and processes that improve energy efficiency and resilience in the building sector. Project activities would include facilitating the outreach and exchange of information among DOE, SEOs, key stakeholders, and private sector organizations across building energy technologies and other energy sectors relevant to BTO's work. Project work would be completed over a single Budget Period. All project activities would consist exclusively of intellectual, academic, or analytical activities such as information gathering, data analysis, and data dissemination.
