**U.S. DEPARTMENT OF ENERGY
OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY
NEPA DETERMINATION**

RECIPIENT: Pacific International Center for High Technology Research

STATE: HI

PROJECT TITLE : Hawaii Renewable Energy Development Venture

Funding Opportunity Announcement Number	Procurement Instrument Number	NEPA Control Number	CID Number
Project 10 - Kunoa	DE-FG36-08GO88146	GFO-88146-017	GO88146

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

- A11 Technical advice and assistance to organizations** Technical advice and planning assistance to international, national, state, and local organizations.
- A9 Information gathering, analysis, and dissemination** Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide funding to the Pacific International Center for High Technology Research (PICHTR) to fund Kunoa to develop a go-to-market plan for producing a sustainable supply of local beef by leveraging geographic advantages (e.g., natural irrigation with rainy conditions, an abundance of natural grass, a year-round steady climate), incorporating renewable energy technologies and reducing food transportation miles.

Kunoa is a sub recipient within the PICHTR award, DE-FG36-08GO88146. PICHTR administers the Energy Excelerator Program which has been previously reviewed by NEPA (GFO-GO88146-009, CX A9, A11, B5.1, 3/27/2013).

The proposed project activities would include customer discovery activities such as validating core assumptions about potential customers and stakeholders; developing questions to understand the market and market economics; customer delivery meetings; customer delivery evaluation and strategic planning; participating in Energy Excelerator activities; participating in outreach and social media activities, and reporting on progress. The proposed project would be limited exclusively to intellectual, academic, or analytical activities and would use no physical materials beyond basic office supplies and software.

Based on a review of the project information and the above analysis, DOE has determined that the proposed project would not have a significant individual or cumulative impact to human health and/or environment. DOE has determined that this project is consistent with actions outlined in DOE categorical exclusion A9 "Information gathering, analysis and dissemination" and A11 "technical advice and planning assistance" and is therefore categorically excluded from further NEPA review.
