OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY
NEPA DETERMINATION**

RECIPIENT:Pacific International Center for High Technology Research

STATE: HI

PROJECT TITLE: Hawaii Renewable Energy Development Venture

Funding Opportunity Announcement Number	Procurement Instrument Number	NEPA Control Number	CID Number
Project 9 - GoElectric	DE-FG36-08GO88146	GFO-88146-016	GO88146

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

A11 Technical advice and assistance to organizations Technical advice and planning assistance to international, national, state, and local organizations.

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide federal funding to Pacific International Center for High Technology Research to develop a complete understanding of the Hawaiian market for GoElectric's patented micro grid technology that seamlessly integrates grid power with renewable energy, battery storage and generators for maximum energy efficiency, energy reliability and energy security. The ultimate goal of GoElectric's project 8 is secure, reliable power that actively reduces peak loads and fixes power quality problems.

GoElectric is a sub recipient within the PICHTR award, DE-FG36-08GO88146. PICHTR administers the Energy Exclerator Program which has been previously reviewed by NEPA (GFO-GO88146-009, CX A9, A11, B5.1, 3/27/2013).

Activities associated with the proposed project would include an analytical review of market data, feasibility studies and customer interviews. The proposed project would be limited exclusively to intellectual, academic, or analytical activities. The proposed project would use no physical materials beyond basic office supplies and software.

Based on review of the project information and the above analysis, DOE has determined the proposed project would not have a significant individual or cumulative impact to human health and/or environment. DOE has determined that this project is consistent with actions outlined in DOE categorical exclusions A9 "Information gathering, analysis, and dissemination" and A11 "Technical advice and assistance to organizations" and is therefore categorically excluded from further NEPA review.
