Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A11 Technical advice and assistance to organizations Technical advice and planning assistance to international, national, state, and local organizations.

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to authorize providing technical assistance regarding a prize competition which would seek to develop innovative methods for excluding fish from water diversions; known as the Improving Fish Exclusion from Water Diversions and Intakes Prize (Fish Prize).

The Fish Prize would be administered and funded by the United States Bureau of Reclamation. White papers would be submitted that identify innovative methods for excluding fish from water diversions and intakes. The competition would encourage out of the box thinking to cover a broad range of fish exclusion applications. The competition would be limited to submission of written white papers and would include no research, fabrication, or testing.

DOE would be a collaborator in the prize competition. DOE's role would be limited to providing technical advice and assistance to Reclamation in reviewing the submissions.
