

## NOTICE OF AVAILABILITY

The U.S. Department of Energy (DOE) has prepared a draft Environmental Assessment (EA) to analyze and describe the potential environmental impacts associated with the:

**Emera Compressed Natural Gas (CNG) Facility  
Port of Palm Beach, Florida  
DOE/EA 1976D**

DOE's National Energy Technology Laboratory (NETL) has prepared the draft EA in accordance with the National Environmental Policy Act (NEPA). Emera is proposing to construct and operate facilities to receive, dehydrate, and compress natural gas that will be transported via trailers, tank containers, and ocean-going carrier for export through the Port of Palm Beach. The proposed Emera facility will initially be capable of loading 8 million cubic feet per day (MMcf/day) of CNG into ISO containers and, after full build out, will be capable to load up to 25 MMcf/day. The draft EA is available for review on the following website:

<http://www.netl.doe.gov/library/environmental-assessments>

Public comments on the EA's analysis and results of the environmental impacts of implementing the proposed action will be accepted until **March 18, 2015**. Please mail comments to the DOE NETL, c/o Mr. Fred Pozzuto, 3610 Collins Ferry Road, Bldg. 1, MS B07, Morgantown, WV 26507, or by email to [Fred.Pozzuto@netl.doe.gov](mailto:Fred.Pozzuto@netl.doe.gov).
