

PJM Implementation of FERC Order 2222 ISO/RTO Panel

Danielle Croop, PJM Interconnection

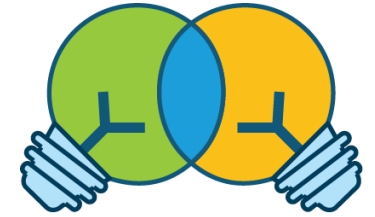

Expected to have broad impacts on market participation by distributed energy resources (DER).

PJM has a robust demand response (DR) model. (Allows DER participation as DR through aggregations)

PJM will work with stakeholders and members in complying with the order.

A new collaboration paradigm between PJM, utilities, and states.

1 Ensuring safety & reliability of transmission & distribution systems

2 Locational requirements – How broad geographically?
• Necessary metering and telemetry

3 Size Requirements for Participation

**BALANCING
PRIORITIES**
