

United States Department of Energy

Project Management Achievement Award

Presented to

The Office of Science's Utilities Upgrade Project

The Utilities Upgrade Project provides Fermilab with a dependable utility infrastructure essential to support the development and production of accelerator technology, a key to successfully accomplishing the Office of Science's mission. The \$36 million project included design and construction of an upgraded industrial cooling water system and an upgraded high-voltage electrical system. The project team's careful planning and execution ensured that the project successfully achieved its goals, while greatly increasing Fermilab's electrical, fire suppression, and industrial cooling water reliability. The project team is commended for this outstanding accomplishment.
