

United States Department of Energy

Project Management Achievement Award

Presented to

The National Nuclear Security Administration's Device Assembly Facility Argus, Perimeter Protection Subproject

The Device Assembly Facility Argus, Installation Perimeter Protection subproject team is recognized for implementing innovative solutions during project execution which resulted in completing the project four months ahead of schedule with a cost savings of nearly \$6 million, as compared to the approved performance baseline. The success of this high performing project team has not only delivered safe, quality construction ahead of schedule and under budget, but the team mitigated a significant amount of security risk, increased mission execution efficiency, and helped NNSA to position itself for a successful future.
