Categorical Exclusion Determination Form

Proposed Action Title: CATEGORICAL EXCLUSION (CX) DETERMINATION FOR ALTERATIONS TO EXISTING BUILDINGS, CONSTRUCTION OF SMALL-SCALE SUPPORT STRUCTURES, AND RELOCATION OF MACHINERY AND EQUIPMENT (CX-GEN-012)

Program or Field Office: Oak Ridge Office, Oak Ridge, Tennessee

Location(s) (City/County/State): Oak Ridge, TN; Berkeley, CA; Menlo Park, CA; Newport News, VA; and other DOE-operated facilities and ancillary areas associated with these sites, programs, and projects

Proposed Action Description:

The proposed actions would involve minor alterations to structures and the operation of these structures including, but not limited to, (1) modifying, installing, extending, and enclosing docks and platforms; (2) refurbishing buildings, offices, and rooms; (3) modifying and renovating laboratories; (4) converting rooms/laboratories into office space; (5) installing and replacing canopies; (6) installing and modifying stairways; (7) installing new flooring, stainless steel flooring, and floor decking; (8) providing structural support; (9) installing and replacing doorways; (10) installing and replacing siding; (11) providing storage areas for nonwaste materials; (12) relocating office, shop, and storage areas; (13) providing handicap access; (14) modifying traffic and work areas within buildings; (15) converting areas into bathrooms; (16) providing ingress/egress routes; and (17) installing docking collars. The proposed actions would also include (1) transporting support structures to the site, establishing the structures at the site, and removing the structures from the site when no longer needed or (2) constructing small-scale support structures, including small-scale additions to existing facilities, within or contiguous to developed areas. Security structures would include installation of chain link fences, barbed wire fences, wood fences, security doors, roll-up doors, wire mesh barriers, vault-type cages, automated portals, and central alarm stations. Actions would also include (1) surface grading and leveling necessary for installation of the structures; (2) construction of access roads, sidewalks, and parking lots; (3) minor excavation for installation of underground utilities; and (4) installation of aboveground utilities. Drainage run-off control would be provided by means of standard erosion control techniques (e.g., through the use of silt fences and hay bales) to prevent the potential for impacting streams or water channels as the result of sediment loading. Stream diversion channels would be constructed, if needed. Clearing, grading, and excavation actions would be scheduled to avoid adverse weather conditions. Items to be relocated would include, but not be limited to, analytical laboratory apparatus, electronic hardware, maintenance equipment, and health and safety equipment.

All installation/construction wastes generated during the proposed actions would be stored, handled, packaged, and disposed of in existing permitted/approved storage/disposal facilities and in a manner appropriate for the waste type and level of contamination as determined in a project waste management plan. The proposed action would be evaluated before implementation to identify options to reduce or eliminate generation of waste materials.

The proposed alterations to existing buildings, construction of small-scale support structures, and relocation of machinery and equipment actions that would take place on the Oak Ridge Reservation (ORR) have been reviewed in accordance with the Cultural Resource Management Plan (CRMP) or applicable sections in a ratified Programmatic Agreement document and would not result in an adverse effect to historic properties included or eligible for inclusion in the National Register of Historic Places (National Register). If the proposed ORR actions would have an adverse effect on properties included or eligible for inclusion in the National Register, DOE would consult with the State Historic Preservation Officer (SHPO) and initiate actions specified in procedures set forth in the Advisory Council's regulations in 36 CFR Part 800.

For sites other than the ORR, DOE would follow the Section 106 process and would consult with the respective SHPO, as appropriate.

Should the proposed actions involve ground disturbances at locations where an archeological survey had not been conducted or take place at previously disturbed locations where the potential exists to exceed the depth of previous ground disturbances, DOE would consult with the SHPO to determine whether an archeological survey would be warranted prior to initiating the proposed actions.

To ensure that sensitive resources are protected, existing maps and surveys/studies on threatened and endangered species, wetlands and floodplains, and historically sensitive areas would be used to locate these areas. In addition, personnel responsible for identifying these resources would be consulted and, if warranted, additional surveys and walkovers would be conducted to confirm or update available information.

No known extraordinary circumstances would be associated with these actions that might affect the significance of the environmental effects of the proposed action based on past similar actions. These actions would not be connected to other actions with potentially significant impacts or related to other proposed actions with cumulatively significant impacts; they would meet the conditions that are integral elements of the classes of actions which may be categorically excluded from further National Environmental Policy Act (NEPA) documentation. Should the action not meet the conditions for CX consideration, a separate NEPA document would be prepared and submitted to DOE-ORO for review and approval.

Although an action might fall under the category of "alterations to existing buildings and construction of small-scale support structures," a separate NEPA review would be performed and documented should the action or related/cumulative effect of the action have the potential to result in an unusual or significant impact to the environment.

Categorical Exclusion(s) Applied:

B1.11 – Fencing
B1.15 - Support buildings
B1.31 - Installation or relocation of machinery and equipment

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
