

DOE/EIS-0463

FINAL

**NORTHERN PASS
TRANSMISSION LINE PROJECT
ENVIRONMENTAL IMPACT STATEMENT**

VOLUME 3: APPENDIX L

**U.S. DEPARTMENT OF ENERGY
OFFICE OF ELECTRICITY DELIVERY
AND ENERGY RELIABILITY
WASHINGTON, DC**

AUGUST 2017

Department of Energy
Washington, DC 20585
August 2017

Dear Sir/Madam:

Enclosed is the final *Northern Pass Transmission Line Project Environmental Impact Statement* (DOE/EIS-0463) prepared by the Department of Energy (DOE) pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations.

The United States Forest Service (USFS) – White Mountain National Forest, United States Environmental Protection Agency (EPA) – Region 1, United States Army Corps of Engineers (USACE) – New England District, and the New Hampshire Office of Energy and Planning (NHOEP) are cooperating agencies in the preparation of the EIS.

The proposed DOE action in the final EIS is to issue a Presidential permit to the Applicant, Northern Pass LLC, to construct, operate, maintain, and connect a new electric transmission line across the U.S./Canada border in northern New Hampshire (NH).

DOE has prepared this final EIS to evaluate the potential environmental impacts in the United States of the proposed action and the range of reasonable alternatives, including the No Action alternative. Under the No Action alternative, the Presidential permit would not be granted, and the proposed transmission line would not cross the U.S./Canada border.

In addition to its Presidential permit application to DOE, Northern Pass LLC applied to the USFS for a special use permit that would authorize Northern Pass LCC to construct, own, operate and maintain an electric transmission line to cross portions of the White Mountain National Forest under its jurisdiction. The final EIS will be used by the Forest Supervisor of the White Mountain National Forest to inform the Record of Decision in regard to this requested use.

DOE will use the EIS to ensure that it has the information it needs for informed decision-making.

The final EIS will also be posted on the project EIS website, <http://www.northernpasseis.us/> and DOE's NEPA website at <https://energy.gov/nepa/listings/environmental-impact-statements-eis>.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Mills".

Brian Mills
Transmission Permitting and Technical Assistance,
Office of Electricity Delivery and Energy Reliability
U.S. Department of Energy

ABSTRACT: Northern Pass Transmission, LLC (Northern Pass) has applied to the DOE for a Presidential permit to construct, operate, maintain, and connect a 192-mile (309-km) electric transmission line across the United States (U.S.)/Canada border in northern New Hampshire (NH). This final EIS addresses the potential environmental impacts of the Project (Proposed Action), the No Action Alternative, and ten additional action alternatives (Alternatives 2 through 6, with variations). The NH portion of the Project would be a single circuit ± 320 kilovolt (kV) high voltage direct current (HVDC) transmission line running approximately 158 miles (254 km) from the U.S. border crossing with Canada in Pittsburg, NH, to a new direct current-to-alternating current (DC-to-AC) converter station to be constructed in Franklin, NH. From Franklin, NH, to the Project terminus at the Public Service of New Hampshire's existing Deerfield Substation located in Deerfield, NH, the Project would consist of 34 miles (55 km) of 345 kV AC electric transmission line. The total length of the Project would be approximately 192 miles (309 km).

PUBLIC COMMENTS: In preparing this final EIS, DOE considered comments received during the scoping period, which extended from February 11, 2011 to June 14, 2011, and was reopened from June 15, 2011 to November 5, 2013 (DOE accepted and considered all comments during the scoping period from February 11, 2011 to November 5, 2013), and the public comment period on the draft EIS (July 31, 2015 through April 4, 2016). Comments on the draft EIS were accepted during the 45-day period

following publication of EPA's Notice of Availability (NOA) in the *Federal Register* on July 31, 2015; the public comment period was extended until April 4, 2016 following publication of EPA's NOA of the supplement in the *Federal Register* on November 20, 2015. DOE held four public meetings on the draft EIS in Colebrook, NH on March 7, 2016; Waterville Valley, NH on March 9, 2016; Concord, NH on March 10, 2016; and Whitefield, NH on March 11, 2016. All comments were considered during preparation of this final EIS. Appendix L in Volume 3 of this EIS contains the comments received on the draft EIS and DOE's responses to these comments. This final EIS contains revisions and new information based in part on comments received on the draft EIS. Vertical bars in the margins marking changed text indicate the locations of these revisions and new information. Deletions are not indicated. Appendices J and K in Volume 2 and Appendix L in Volume 3 are entirely new parts of this EIS; therefore, they do not contain bars indicating changes from the draft EIS.

The EIS analyzes the potential environmental impacts of DOE issuing a Presidential permit for the proposed Northern Pass Project, which is DOE's proposed federal action. DOE will use the EIS to inform its decision on whether to issue a Presidential permit. Additionally, Northern Pass has applied to the USFS for a special use permit (SUP) authorizing Northern Pass to construct, operate, and maintain an electric power transmission line crossing portions of the WMNF. The WMNF Forest Supervisor will use the EIS to inform its decision regarding: 1) whether to issue a SUP under the Federal Land Policy and Management Act; 2) the selection of an alternative; 3) any need to amend the Forest Plan; and 4) what specific terms and conditions should apply if a SUP is issued.

Copies of the final EIS are available for public review at 30 local libraries and town halls, or a copy can be requested from Mr. Brian Mills. The EIS is also available on the Northern Pass EIS website (<http://www.northernpasseis.us/>). DOE will announce its decision on the Proposed Action in a Record of Decision (ROD) in the *Federal Register* no sooner than 30 days after the EPA publishes the NOA of the final EIS. The USFS will announce its draft decision on the Proposed Action in a draft ROD in the *Federal Register* shortly after the EPA publishes the NOA of the final EIS.

- Attachment C. Response to All Comments on the Draft EIS

L.1 PUBLIC COMMENT PROCESS

L.1.1 INTRODUCTION

On October 14, 2010, Northern Pass Transmission, LLC¹ (Northern Pass or Applicant) applied to the Department of Energy (DOE) for a Presidential permit pursuant to Executive Order (EO) 10485, as amended by EO 12038, and the regulations codified at 10 Code of Federal Regulations (CFR) § 205.320 *et seq.* (2000), “Application for Presidential Permit Authorizing the Construction, Connection, Operation, and Maintenance of Facilities for Transmission of Electric Energy at International Boundaries.”² The Presidential permit for the Applicant (OE Docket Number PP-362), if issued, would authorize Northern Pass to construct, operate, maintain, and connect facilities at the international border of the United States (U.S.) for the transmission of electric energy across the U.S./Canada border in northern New Hampshire (NH). DOE does not have siting or project alignment authority for projects proposed in applications for Presidential permits.

The DOE’s Office of Electricity Delivery and Energy Reliability is responsible for reviewing Presidential permit applications and determining whether to grant a permit for electric transmission facilities that cross the U.S. international border. The DOE has determined that the issuance of a Presidential permit would constitute a major federal action and that an environmental impact statement (EIS) is the appropriate level of environmental review under National Environmental Policy Act (NEPA) of 1969 (42 United States Code [U.S.C.] § 4321 *et seq.*).

The DOE has prepared this EIS in compliance with the requirements of NEPA, the Council on Environmental Quality (CEQ) regulations for implementing NEPA (40 CFR Parts 1500–1508), DOE implementing procedures for NEPA (10 CFR Part 1021), DOE floodplain and wetlands environmental review requirements (10 CFR Part 1022), and other applicable federal laws. The DOE invited several federal and state agencies to participate in the preparation of this EIS as cooperating agencies because of their special expertise or jurisdiction by law. The cooperating agencies are the United States Forest Service (USFS) – White Mountain National Forest (WMNF), the United States Environmental Protection Agency (EPA) – Region 1, the United States Army Corps of Engineers (USACE) – New England District, and the New Hampshire Office of Energy and Planning (NHOEP).

After its initial application, on July 1, 2013, the Applicant submitted an amended application for a Presidential permit that reflected proposed changes to the route of the Project, and in July 2015, the DOE issued the draft *Northern Pass Transmission Line Project Environmental Impact Statement* (draft EIS) (80 *Federal Register* [FR] 45652 [July 31, 2015]). The draft EIS analyzed potential environmental impacts from the proposed project (as described in the amended Presidential permit application filed by Northern Pass on July 1, 2013) and the range of reasonable alternatives (collectively referred to as “the Project”).

¹ Northern Pass Transmission, LLC is owned by Eversource Energy Transmission Ventures, Inc. (formerly NU Transmission Ventures, Inc.), a wholly-owned subsidiary of Eversource Energy (formerly Northeast Utilities), which is a publicly-held public utility holding company. Public Service of New Hampshire (PSNH) is also a wholly-owned subsidiary of Eversource Energy, and does business as Eversource Energy.

² Full text of the federal laws can be accessed at the following website: <http://uscode.house.gov/browse.xhtml>. EOs can be accessed at the following website: <http://www.archives.gov/federal-register/executive-orders/disposition.html>. Full text of the state laws can be access at the following website: <http://www.nh.gov/government/laws.html>.

Subsequent to the publication of the draft EIS, Northern Pass submitted a “Further Amendment to Presidential Permit Application” in August 2015 (Northern Pass 2015) that made changes to the Applicant’s proposed project. Specifically, the August 2015 amendment proposed to bury an additional 52 miles of the transmission line in roadway corridors between Bethlehem and Bridgewater, NH.³ Approximately 49 miles of this additional burial is the same as was analyzed as part of Alternatives 4c and 5c in the draft EIS (each alternative is described in detail in **Section 2.3**). Approximately 3 miles of additional burial in Bethlehem, NH, was not analyzed in the draft EIS, as it would extend immediately to the north of the alignment analyzed as Alternative 5c. Northern Pass also proposed a minor shift (less than 100 feet) in the international border crossing location, two new transition stations (one in Bridgewater, NH, and one in Bethlehem, NH, to transition the line between overhead and underground), a change of the project size from 1,200 megawatts (MW) to 1,000 MW with a potential transfer capacity of up to 1,090 MW, and other design changes (e.g., change in converter technology and type of cable).

Although Northern Pass’ revised proposal (referred to as Alternative 7) was principally evaluated within the draft EIS under a combination of several of the action alternatives, DOE determined that providing a supplement to the draft EIS would allow the potential environmental impacts of Alternative 7 to be more clearly displayed as an additional singular alternative and facilitate a comparison among the alternatives. DOE regulations provide that DOE may supplement a draft EIS at any time, to further the purposes of NEPA (10 CFR § 1021.314(b)).

Thus, DOE issued a notice of intent (NOI) to prepare a supplement to the draft EIS (80 FR 58725 [September 30, 2015]) and, in November 2015, issued a *Supplement to the Draft Northern Pass Transmission Line Project Environmental Impact Statement* (DOE/EIS-0463-S1). The supplement to the draft EIS contains an analysis of the potential environmental impacts of Alternative 7 and supplements the analysis contained in the July 2015 draft EIS.

In addition to its Presidential permit application to DOE, Northern Pass applied to the USFS on June 28, 2011, for a special use permit (SUP) that would authorize Northern Pass to construct, own, operate, and maintain an electric transmission line crossing portions of the WMNF. On September 5, 2013, Northern Pass submitted an amended SUP application to the USFS which also reflected proposed changes to the route of the Project. The USFS is a cooperating agency in the preparation of this EIS.

This EIS, *Northern Pass Transmission Line Project Environmental Impact Statement* (DOE/EIS-0463), analyzes potential environmental impacts from the Proposed Action (as described in the further amended Presidential permit application filed by Northern Pass on August 31, 2015 and analyzed as Alternative 7 in the supplement to the draft EIS) and the range of reasonable alternatives (collectively referred to as “the Project”).

DOE’s Proposed Action (Agency Preferred Alternative) is to issue a Presidential permit for a proposed high-voltage direct current (HVDC) transmission line that, as currently designed, would be capable of transmitting up to 1,090 megawatts (MW) of power in either direction (Canada to the U.S. and U.S. to Canada). The northern HVDC converter station is proposed to be constructed at the Des Cantons Substation in Québec, Canada, and would be connected to an HVDC line that would run southward in Québec for approximately 45 miles (72 km) where it would cross the U.S./Canada border into Pittsburg, NH.

The New Hampshire portion of the Proposed Action would be a single circuit ± 320 kilovolt (kV) HVDC transmission line running approximately 158 miles (254 km) from the U.S. border crossing with Canada in Pittsburg, NH, to a new direct current (DC)-to-alternating current (AC) converter station to be constructed

³ The original Proposed Action (Alternative 2 in the draft EIS) included approximately 8 miles of underground cable. The revised Proposed Action (Alternative 7) includes an additional 52 miles of underground cable, for a total of approximately 60 miles of underground cable.

in Franklin, NH. From Franklin, NH, to the Project terminus at the Public Service of New Hampshire's (PSNH's) existing Deerfield Substation located in Deerfield, NH, the Proposed Action would consist of 34 miles (55 km) of 345 kV AC electric transmission line. Approximately 32 miles (51 km) of new overhead HVDC transmission line would be constructed on land owned, leased, or otherwise controlled by Northern Pass in a new transmission route. The remainder of new overhead HVDC and HVAC transmission lines would be located within the existing PSNH transmission route. Approximately 60 miles (97 km) of transmission cable would be constructed underground in roadway corridors in Clarksville and Stewartstown, NH, and between Bethlehem, and Bridgewater, NH. The total length of the Proposed Action would be approximately 192 miles (309 km).

The presentation of the analysis in the EIS divided the proposed Project into three geographic sections and one administrative section defined by the WMNF: Northern Section, Central Section, Southern Section, and WMNF Section. **Appendix A** of the final EIS contains maps showing the three geographic and one administrative sections, the Proposed Action, No Action, and other alternatives considered in this EIS. Responses to individual comments received on the draft EIS may be found in **Attachment C** of this document.

This document constitutes the Comment Response Document on the Northern Pass Transmission Line Project Final Environmental Impact Statement. All comment documents are also available on the EIS website (<http://www.northernpasseis.us/>).

L.1.2 HISTORY OF PUBLIC OUTREACH AND COMMENT PROCESS

L.1.2.1 PUBLIC SCOPING PROCESS

On February 11, 2011, the DOE published a "Notice of Intent to Prepare an Environmental Impact Statement and to Conduct Public Scoping Meetings and Notice of Floodplains and Wetlands Involvement" (the NOI) in the *Federal Register* (76 FR 7828), initiating the NEPA public scoping period. In the NOI, the DOE announced its intention to prepare an EIS to assess the potential environmental impacts of issuing a Presidential permit for the Northern Pass Project. On June 15, 2011, the DOE announced a reopening of the public scoping period, in anticipation of additional route information to be provided by Northern Pass, and stated that the scoping period would remain open until the DOE provided further notice of its closing (76 FR 34969). After the Applicant amended its Presidential permit application and its SUP application, the DOE published an "Amended Notice of Intent to Modify the Scope of the Environmental Impact Statement and to Conduct Public Scoping Meetings and Notice of Floodplains and Wetlands Involvement" (the amended NOI) in the *Federal Register* (78 FR 54876) on September 6, 2013. The public scoping period closed 60 days later, on November 5, 2013. DOE accepted and considered all comments received during the scoping period from February 11, 2011 to November 5, 2013, while developing the draft EIS.

DOE conducted a total of eleven scoping meetings in New Hampshire during the public scoping period. Seven meetings were held in March 2011, and four additional meetings were held in September 2013, following publication of the amended NOI. The meetings provided interested parties the opportunity to view exhibits and information regarding the Project and to provide both oral and written comments. Additionally, the Applicant was in attendance to answer questions and provide information to attendees.

During the entire public scoping period, the DOE received 7,560 comments from over 6,400 individuals, businesses, municipalities, government agencies, and other organizations. Written and oral comments were given equal weight, and the DOE considered all comments emailed, postmarked, or submitted on the EIS website by November 5, 2013, in defining the scope of the draft EIS. Comments submitted after the close of the comment period were considered to the extent practicable. A Scoping Report was posted to the EIS website on March 12, 2014, providing a summary of all scoping comments received.

On May 1, 2014, a Scoping Report Alternatives Addendum was posted to the EIS website. This document summarized the alternatives that the DOE had identified to date for analysis in the draft EIS. The alternatives described in that document included the proposal presented by Northern Pass in its amended application to the DOE, as well as alternatives identified by the DOE, the cooperating agencies, and from public scoping comments. The Scoping Report Alternatives Addendum was prepared in response to NH's Congressional delegation requests that the DOE provide an update on the status of the consideration of alternatives between the scoping period and issuance of the draft EIS.

L.1.2.2 DRAFT EIS PUBLIC REVIEW PROCESS

In July 2015 DOE issued the draft EIS. The public review period was initiated through publication of a Notice of Availability (NOA) in the *Federal Register* by EPA (80 FR 45652 [July 31, 2015]) (**Attachment A** of this Comment Response Document). Methods similar to those used during the scoping period were used to notify the public and applicable federal and state agencies of the public review period for the draft EIS, including distributing the document to individuals or parties who submitted scoping comments, and to other interested parties that requested a copy of the EIS. A legal notice was published in the *Union Leader*, the newspaper of record for the WMNF, on November 5, 2015 (**Attachment B** of this Comment Response Document). DOE made the draft EIS available online at the Northern Pass EIS website (<http://www.northernpasseis.us>) and on the DOE NEPA website (<http://energy.gov/nepa>), and copies of the draft EIS were publicly available at public libraries located in the proposed Project area (**Table L-1**). The draft EIS was also circulated to Federal, state, and local agencies with jurisdiction by law or special subject matter expertise and to any person, stakeholder organization, or agency that requested a copy (40 CFR § 1502.19).

Table L-1. Public Libraries Where the Draft EIS was Available during the Public Comment Period

Table L-1. Public Libraries Where the Draft EIS was Available during the Public Comment Period

Library Name	Location
Pease Public Library	1 Russell Street, Plymouth, NH 03264-0414
Sanbornton Public Library	27 Meetinghouse Hill Road, Sanbornton, NH 03269
Richardson Memorial Library	1411 Main Street, Sugar Hill, NH 03586
Stark Town Office	1189 Stark Highway, Stark, NH 03582
Dennis Joos Memorial Library	1526 South Main Street, West Stewartstown, NH 03597
Stratford Public Library	74 Main Street, North Stratford, NH 03590
Thornton Public/School Library	1884 NH Route 175, Thornton, NH 03285
Whitefield Public Library	8 Lancaster Road, Whitefield, NH 03598
Woodstock Town Office	165 Lost River Road, North Woodstock, NH 03262

Public hearings to receive comments on the draft EIS were scheduled for October 2015. As a result of Northern Pass' August 31, 2015 revision to its proposal, DOE issued a NOI to prepare a supplement to the draft EIS (80 FR 58725 [September 30, 2015]). This notice extended the comment period until December 31, 2015, and postponed the public hearings. On November 20, 2015, DOE issued the supplement to the draft EIS; EPA's Notice of Availability was published on November 20, 2015 (80 FR 72719 [2015]). Public hearings on the draft EIS and supplement were scheduled for December 2015 (80 FR 72716 [2015]). On December 4, 2015, the public hearings were postponed and the comment period was extended until April 4, 2016. On February 4, 2016, the public hearings were rescheduled for March 2016 (81 FR 5995 [2016]). Four public hearings were held in March 2016. For the convenience of the public, DOE and the cooperating agencies conducted two of these hearings in conjunction with the New Hampshire Site Evaluation Committee (SEC). The locations, dates, and times of the joint hearings were:

- Colebrook, NH, Colebrook Elementary School, Gymnasium, 27 Dumont Street, Monday, March 7, 2016, 5–8 p.m.
- Concord, NH, Grappone Conference Center, Granite Ballroom, 70 Constitution Avenue, Thursday March 10, 2016, 5–8 p.m.

The structure of the joint hearings included an opening presentation by the Applicant, a question and answer session during which the Applicant and SEC answered written questions submitted by the public, and a formal commenting session. The question and answer and commenting sessions were transcribed by a stenographer.

Additional public hearings were also conducted by the DOE and the cooperating agencies (without the involvement of the New Hampshire SEC) to receive oral and written comments on the draft EIS at the following locations commencing at the times identified:

- Waterville Valley, NH, Waterville Valley Conference and Event Center, Waterville Room, 56 Packards Road, Wednesday, March 9, 2016, 5–8 p.m.
- Whitefield, NH, Mountain View Grand Resort & Spa, Presidential Room, 101 Mountain View Road, Friday, March 11, 2016, 5–8 p.m.

The structure of these hearings included a formal commenting session which was transcribed by a stenographer. All four public hearings allowed the public to provide both written and oral comments on the draft EIS.

The 248-day public comment period on the draft EIS and supplement to the draft EIS closed on April 4, 2016. DOE received 1,037 comments from individuals, interested groups, tribal governments, and federal, state, and local agencies during the public comment period on the draft EIS. In addition, approximately 165

commenters spoke at the four public hearings. These comments are provided exactly as they were received in **Attachment C** of this Comment Response Document.

L.1.3 COOPERATING AGENCIES

The DOE invited several federal and state agencies to participate in the preparation of this EIS as cooperating agencies because of their special expertise or jurisdiction by law. The cooperating agencies are the USFS – WMNF, the United States Environmental Protection Agency (EPA) – Region 1, the United States Army Corps of Engineers (USACE) – New England District, and the New Hampshire Office of Energy and Planning (NHOEP).

L.1.3.1 U.S. FOREST SERVICE – WHITE MOUNTAIN NATIONAL FOREST

A portion of the Proposed Action would cross National Forest System (NFS) lands on the WMNF following an existing transmission route that is under a SUP currently held by PSNH and through easements held by PSNH. The Applicant has applied for its own SUP for the Project to cross the WMNF. This final EIS, prepared by the DOE, is intended to provide the analysis necessary to support a USFS decision on whether to issue a SUP allowing the Proposed Action (or alternative) to cross the WMNF (including whether any amendment to the Forest Plan would be required). The Responsible Official for the USFS decision is the Forest Supervisor of the WMNF.

The USFS has assembled an Inter-Disciplinary Team (ID Team) comprised of a team leader and USFS specialists in appropriate resource areas to ensure the DOE EIS meets USFS needs.

L.1.3.2 U.S. ENVIRONMENTAL PROTECTION AGENCY – REGION 1

The EPA is required under Section 309 of the Clean Air Act (CAA) to review and publicly comment on the environmental impacts of major federal actions for which an EIS is prepared. EPA is also responsible for publishing the NOAs of draft and final EISs in the *Federal Register*, which initiate regulatory timeframes for the environmental review process. Additionally, the EPA would consult with USACE for any permits that would be required under Section 404 of the 1977 Clean Water Act (CWA) (33 U.S.C. §§ 1251–1387).

L.1.3.3 U.S. ARMY CORPS OF ENGINEERS – NEW ENGLAND DISTRICT

The USACE is responsible for ensuring compliance with Section 404 of the CWA. CWA Section 404 requires a permit prior to discharging dredged or fill material into jurisdictional waters of the U.S., including wetlands. The USACE may adopt portions of the information and analysis presented in this EIS in its preparation of a separate environmental analysis for compliance with NEPA and its decision-making for the Section 404 permits needed for the Project. The Project would cross areas of USACE jurisdiction such as wetlands, stream crossings, and vernal pools.

L.1.3.4 NEW HAMPSHIRE OFFICE OF ENERGY AND PLANNING

The NHOEP provides information, data, and guidance to assist decision-makers on issues pertaining to development, land protection, energy use, and community planning. As a cooperating agency, NHOEP is participating in the DOE’s NEPA process and providing special expertise regarding issues to be addressed in this EIS.

L.2 AGENCY AND PUBLIC COMMENTS ON THE DRAFT EIS

A variety of issues and concerns were raised during the public review comment period on the draft EIS. All substantive comments on the draft EIS received or postmarked before the end of the comment period were considered in preparing the final EIS. Comments received after the end of the comment period were considered to the extent practicable. DOE responded to those comments that are within the scope of and relevant to the analysis in this EIS.

This section presents all comments exactly as they were received, as well as transcripts of comments provided during the public hearings on the draft EIS. All written or other markings on comment documents are original to the comment and are presented below as submitted to DOE by the commenting individual, agency or organization. Comment numbers were assigned based on the order in which the comments were received. The comments (whether written or oral) are presented in **Attachment C** of this Comment Response Document in chronological order. The comment number is presented in the top right corner of the page. **Table L-2** presents an index of comments sorted by comment number. Comments received from organizations are indicated, and comments without an indication are from individuals. **Table L-3** provides an alphabetized index of individual comments based on the last name of the commenter in order to assist the reader. Each comment within a comment document is delineated (i.e., bracketed). Each discrete comment within a document is marked by a vertical bar in the margin and a unique comment number. For example, 0047-1, is the first comment within comment document 47. Responses to the delineated individual comments are displayed in the margin to the right of the comment.

A list of examples of major representative issues submitted during the draft EIS public comment period, catalogued by general resource type, are provided in **Table L-4**. In addition, **Table L-5** provides the substantive revisions made from the draft EIS to the final EIS based on agency and public comments. In addition to changes made in response to comments, the final EIS was updated to include a detailed analysis of Alternative 7 in all resources areas and geographic sections, and analysis was updated based on revised project design information from the Applicant. All comments received during the draft EIS public comment period, including late comments, along with DOE's responses are provided in **Attachment C** of this Comment Response Document.

Table L-2. Draft EIS Commenters Presented Chronologically

Comment Number	First Name	Last Name	Commenter Agency or Organization

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
Chapter 1. Purpose and Need	DOE Purpose and Need	<ul style="list-style-type: none"> • Narrow purpose and need resulting in narrow Alternative scope of analysis • Draft EIS failure to explore if there is an actual need for the project • Draft EIS unclear regarding DOE’s criteria regarding the issuance of a Presidential permit • Scope of the DOE’s purpose and need • DOE is obligated to be “consistent with the public interest” to issue a Presidential permit • EIS needs to address current and future power needs in NH • Support the purpose and need for increased energy supply • Prefer using domestic energy resources before importing energy • Hydro-electric is not clean/green energy
	USFS Purpose and Need	<ul style="list-style-type: none"> • Purpose and need is too specific to Northern Pass Project
	Project Objectives	<ul style="list-style-type: none"> • EIS contains outdated economic and financial elements • Support for the project objectives of increase reliability and consistency of New England power sources • Northern Pass is not a “reliability” project • Support for reducing reliability on other energy resources • Need to replace generation retirements in ISO-NE region • Other projects or technologies will meet the project objectives • Additional power is not needed in New England • Reducing the reliance on natural gas is not an adequate purpose and need • Final EIS must acknowledge and analyze greenhouse gas reduction • EIS contains outdated electrical diversity section (1.4.1) • Analysis of comprehensive impacts to meet “clean, low carbon” objective • Outdated calculation in Section 2.5.2 • Support the need to upgrade Coös Loop • Benefits of overhead lines • Benefits of hydroelectric power
Chapter 2. Alternatives	Process Used to Develop Alternatives	<ul style="list-style-type: none"> • Potential error in Section 2.1 • Converter station location • Insufficient development of Alternatives • Request for cost analysis • Alternative developed to address visual concerns
	Description of Geographic Analysis Sections	<ul style="list-style-type: none"> • Impacts in Vermont should be included in analysis • Geographic section analysis is flawed • Upgrades at Scobie Pond Substation should be considered

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
	Alternatives Considered in Detail	<ul style="list-style-type: none"> • Alternatives including underground cable in I-93 through Franconia Notch are not viable and should be rejected • Request analysis of additional Alternatives buried in other interstate highways • Burial through Franconia Notch in I-93 is feasible • I-93 burial preferable to state roads • Burial in NH Route 116 is not viable and should be rejected • Impacts from Alternatives with a route through Plymouth must be considered • Overhead design questions • Technical and economic feasibility of burial • Feasibility of full burial to an Alternative terminus or converter station in Bow, NH • Economic feasibility question • Burial is viable, based on other projects • Questions about underground design and construction details • Questions about converter station • Environmental benefits of burial • Impacts to Bear Rock area
	Alternative 2 Alignment and Design	<ul style="list-style-type: none"> • Alternative 2 should be eliminated • Summary of Alternative 2 impacts • Impacts to WMNF • Geographic analysis of Alternative 2
	Alternative 3 Alignment and Design	<ul style="list-style-type: none"> • Inconsistent with current land use in Project corridor • Support for Alternative 3 • Description of Alternative 3 is insufficient
	Alternative 4b Alignment and Design	<ul style="list-style-type: none"> • Support for Alternative 4b
	Alternatives Considered but Eliminated from Further Detailed Analysis	<ul style="list-style-type: none"> • Rationale for elimination of alternatives (alternative energy generation, energy efficiency, other projects, railroad ROW alternatives) is insufficient and these should be analyzed in detail • Underground cable capacity questions • Further define No Action Alternative energy supply • Other energy projects in the Clean Energy Request for Proposals (RFP) should be considered as alternatives
	Summary of Potential Impacts	<ul style="list-style-type: none"> • Alternative 4a is preferable when impacts are compared to other Alternatives • Alternative 4a offers greater economic benefits than other alternatives.
	No Action Alternative (Alternative 1)	<ul style="list-style-type: none"> • Insufficient analysis of “No Action” Alternative and energy markets under “No Action”
	Alternative 4a Alignment and Design	<ul style="list-style-type: none"> • Alternative 4a not viable due to limitations of burial in I-93 • Alternative 4a minimizes impacts to scenery • Request modifications to Alternative 4a • Alternative 4a economic, environmental, and overall impacts • Project details for Alternative 4a need clarification in the final EIS

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
	Alternative 7 Alignment and Design	<ul style="list-style-type: none"> • Insufficient analysis of Alternative 7 • Request further information about Alternative 7 • Question about Bridgewater transition station
	Alternative International Border Crossing	<ul style="list-style-type: none"> • Additional border crossing, terminus location, and interstate options should be considered • The draft EIS doesn't fulfill NEPA in its range of border crossings • Suggested alternative international border crossing in Vermont, via VT Route 253 • Environmental impacts and NEPA justification for alternative border crossing
	Unanalyzed Alternative and Design Features	<ul style="list-style-type: none"> • Proposed alternative routes and modifications • Request analysis of alternative terminus in Bow, NH • More/shorter towers could be used in design of the Project
Visual Resources	General	<ul style="list-style-type: none"> • Impacts to visual resources from vegetation clearing in ROW should be considered in final EIS • Visual impacts of the Project to Stewartstown/Colebrook, NH should be considered • Questions about impacts in Concord, NH • Impacts in Canaan, VT should be considered • Visual impacts of burial should be considered more thoroughly in final EIS • Questions about the impacts of Alternative 2, 5, and 7 • Questions about impacts within the WMNF • Additional analysis of visual impacts is needed • Questions about impact avoidance measures
	Scope of Analysis	<ul style="list-style-type: none"> • Questions about methods including consideration of WMNF Standards and the Scenery Management System • Request for consideration of new project design details • Impacts to Vermont should be included in scope of analysis • Impacts to Pondicherry Wildlife Refuge should be considered
	Landscape Assessment	<ul style="list-style-type: none"> • Comments about the methods of the landscape assessment, including use of land cover data, viewer experience and exposure assumptions, distance zones, and calculation of visual quality, visual magnitude, visual impact, scenic concern, scenic sensitivity, and scenic impact • Questions about Alternative 7 impact • Impacts of relocated structures should be considered • Visibility analysis in Weeks State Park is inaccurate • The draft EIS overstates visibility of the Project structures. • Visibility analysis in Concord and Franklin
	Roads-Based Analysis	<ul style="list-style-type: none"> • Analysis of impacts to Scenic Byways should be updated and should include a discussion of cumulative impacts • AADT is not an appropriate way to assess potential impacts to roads • Diamond Pond Road should be considered

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
	Viewpoint Assessment	<ul style="list-style-type: none"> • Questions about method of determining Contrast Dominance Ratings, importance of context of visual simulations • Requests for additional visual simulations and key observation points • Questions about accuracy of visual simulations • Request that visual simulations be updated to include revised project design details and Alternative 7
Socioeconomics	General	<ul style="list-style-type: none"> • General benefits of burial • Energy cost benefits of burial • Reliability/cost benefits of burial • Coös Loop upgrade should be considered • Economic benefits to Franklin, NH • Questions about construction spending • Positive general socioeconomic impacts • Negative general socioeconomic impacts • Analysis needs verification in the final EIS • Electricity model assumptions/methods needs further explanation in the final EIS • Burial in roadways offer general socioeconomic benefits • The Project would have a beneficial impact on electricity rates • The Project would displace local or renewable energy • The draft EIS overstates the potential decrease in electricity rates resulting from the Project • Concerns that electricity rates could increase • Fuel diversity and security concerns • Impacts in Canaan, VT should be considered
	Scope of Analysis	<ul style="list-style-type: none"> • Different impacts of underground vs. aboveground alternatives
	Employment	<ul style="list-style-type: none"> • Questions about the duration, type, and location of potential jobs • The Project would generate employment • Burial of the Project would result in more jobs
	Taxes	<ul style="list-style-type: none"> • Different tax impacts from underground vs. aboveground alternatives • Adverse impact on property values • The Project would result in increased tax revenue • Question NP data • Town taxes • Property tax and tourism • Tax displacement • Franklin tax revenue • Depreciation

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
	Tourism	<ul style="list-style-type: none"> • Sugar Hill tourism • Balsams impact • Tourism and property values • Upper Lamprey River tourism • Stark tourism • Tourism and historic/cultural resources • Burial of the Project would have a lesser adverse impact on tourism • Nature and tourism – negative • Questions about electricity model assumptions/methods • The Project would have no impact on tourism • Additional analysis is needed to determine impacts on Tourism • Pittsburg tourism • Cultural tourism • New Hampton tourism • Diamond Pond • Tourism methods
	Electricity System Infrastructure	<ul style="list-style-type: none"> • Electricity model assumptions/methods • Impacts in Canada • Fuel diversity/electricity security • Other generation sources as alternative to the Project • Reliability of electricity supply
	Property Values	<ul style="list-style-type: none"> • The Project would negatively affect property values • The draft EIS overstates impacts to property values • The draft EIS underestimates impacts to property values • Property value methods inadequate • Property value impacts from buried cable • Sugar Hill property value • Impacts to property values should be quantified by town in the final EIS • Property owners should be compensated for losses in property values • Property value decreases would impact tax revenue
Recreation	General	<ul style="list-style-type: none"> • The definition of a trail resource (Section 3.3.3) should be changed in the final EIS • Alternative 7 would result in fewer impacts to recreation resources compared to other alternatives

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
	Impacts to Recreational Sites	<ul style="list-style-type: none"> • WMNF recreation • Recreation in ROW • General reductions in recreation area • General impacts to recreation • Cohos Trail should be considered • Impacts to the Pemigewasset River should be considered in the final EIS • ATV use and hunting • Mitigating impacts to the ANST should be discussed in the final EIS • Impacts to the ANST under Alternatives 2, 3, and 7 should be discussed in the final EIS • Construction and visual impacts to the ANST should be discussed in the final EIS
	Impacts to Visual Resources	<ul style="list-style-type: none"> • Identification/characterization of recreation resources should be revisited in the final EIS • Recreation is impacted visually by the Project • Discussion of impacts to specific resources should be included in the final EIS, including: Upper Ammonoosuc River, Cohos Trail, Sugar Hill, Kinsman Notch, Lost Nation Road, Forest Lake State Park, Coleman State Park, Little Dummer Pond, Franconia Ridge, Percy Peak, Catamount and Hall hills, and Christine Lake. • Impacts to the ANST under Alternative 5a need clarification in the final EIS
Health and Safety	General	<ul style="list-style-type: none"> • Risk of intentional destructive acts • Health and Safety effects of burial of the Project warrant further consideration in the final EIS
	Electric and Magnetic Fields	<ul style="list-style-type: none"> • Health and other concerns associated with EMF exposure • EMF with co-location • Impacts to livestock should be considered • Risk of electrical discharge • Questions surrounding EMF associated with buried lines • Methodology • Comparison of impacts • Deerfield Substation
	Potentially Contaminated Soils and Groundwater	<ul style="list-style-type: none"> • Landfill concerns • Mitigation and site avoidance • Site location • Risk of encountering contaminated soils and groundwater • Regulatory agencies • Solid and hazardous wastes • Circle tri-cleaners
	Weather Extremes	<ul style="list-style-type: none"> • Weather extremes
	Fire Hazards and Fire Response Services	<ul style="list-style-type: none"> • Emergency response • Consequence of emergency response failure need to be addressed in the final EIS • Hazards

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
	Transmission Line Safety Issues	<ul style="list-style-type: none"> • Transmission lines pose general safety issues • Fall zones • Risk of shock and arc flash • Transmission lines pose hazard to aircraft • Interference with Implanted Medical Devices • Mitigation
	General Worker Safety	<ul style="list-style-type: none"> • Regulatory agencies
Traffic and Transportation	General	<ul style="list-style-type: none"> • Aircraft • Impacts to Vermont should be discussed in the final EIS
	Roadway or Rail Line Closures	<ul style="list-style-type: none"> • Traffic disruptions
Land Use	General	<ul style="list-style-type: none"> • Details of Alternative 7 project components require clarification in the final EIS (e.g., converter station and transition stations) • Proposed routes interaction with land easements and of required land use permits
	Land Use and Land Cover	<ul style="list-style-type: none"> • Local planning ordinance • Support for Alternative 7 • Burial impacts to private property
	Conservation Lands	<ul style="list-style-type: none"> • Society for the Protection of NH Forests (SPNHF) Property • No impacts to conservation lands • Impacts to state parks • Impacts in Sugar Hill • Bear Brook State Park • Impacts to WMNF and conservation lands near WMNF • Connecticut Lakes headwaters • Christine Lake
	Protected Rivers	<ul style="list-style-type: none"> • The final EIS should include additional discussion of impacts to Wild and Scenic Rivers
	New and Existing Transmission Routes	<ul style="list-style-type: none"> • No land use impacts • Questions about the PSNH easement on WMNF • The NH Site Evaluation Committee should not judge the application until legal issues have been resolved
	Public Roadway Corridor Ownership Status	<ul style="list-style-type: none"> • The Applicant does not have a right to bury the Project in existing roadways, including in Stewartstown • The final EIS should include relative studies to the existing transportation right of way • Municipalities vote against the use of overhead developments • SPNHF Washburn Forest conflict
	Easements and Special Use Permits	<ul style="list-style-type: none"> • Existing PSNH easements do not allow Project • The Applicant does not have access to the entire Project route • Alternative 3 should be eliminated due to easement limitations • WMNF standards do not apply to easements • Opposed to Alternative 3
	Inventoried Roadless Areas	<ul style="list-style-type: none"> • Burial through WMNF

Table L-4. Summary of Agency and Public Comments on the Draft EIS

Resource or Draft EIS Chapter	Comment Themes	Comment Topics
Noise	Scope of Analysis	<ul style="list-style-type: none"> Noise impact to wildlife Sources of noise Conservancy noise rules Quantifying noise impacts in final EIS Questions about noise impacts from buried transmission line
	Operations, Maintenance, and Emergency Repairs Noise	<ul style="list-style-type: none"> Corona noise Noise impact on property values
Historic and Cultural Resources	Scope of Analysis	<ul style="list-style-type: none"> Questions about the Section 106 process Native American consultation The area of potential effect (APE) of the Project is inconsistent in the draft EIS Questions about the APE (development and definition) Methodology used to identify archaeological and architectural resources/historic properties should be revisited in the final EIS The final EIS should consider cultural landscapes Maintenance and operation effects The Project would have no impact on historic and cultural resources The draft EIS contains incomplete information about the impacts to historic and cultural resources State Register properties should be analyzed in the final EIS Impacts in Deerfield, NH should be considered Discussion of impact in Vermont should be included in the final EIS
	Archaeological Resources and Sensitive Areas	<ul style="list-style-type: none"> Bear Rock site Cemeteries
	Architectural Resources	<ul style="list-style-type: none"> Martin homestead Bridges Indian Stream republic territory Questions about methods Visual impacts to architectural resources should be considered A discussion of impacts to the ANST should be included in the final EIS Impacts to architectural resources are underestimated in the draft EIS

Table L-5. Summary of Substantive Changes to the Draft EIS

Resource or EIS Chapter	Revision(s) to the Draft EIS
Front Matter	<ul style="list-style-type: none"> • Update cover sheet and table of contents
Summary	<ul style="list-style-type: none"> • Updated Project Objectives to include new information regarding regional energy market conditions • Added summary of the draft EIS public review period, including issues raised and issues outside the scope of this EIS (particularly additional information about the Canadian review process for the Hydro-Québec project in Canada) • Updated discussion of Section 106 of the National Historic Preservation Act compliance process • Updated Major Conclusions to include analysis of Alternative 7 – Proposed Action and incorporate revised analysis in the EIS • Updated Summary of Potential Impacts Associated with the Project based on updated analysis
Chapter 1. Purpose and Need	<ul style="list-style-type: none"> • Updated Project Objectives to include new information regarding regional energy market conditions • Added chronology of Presidential permit application process and EIS public notices • Added summary of the draft EIS public review period, including issues raised and issues outside the scope of this EIS (particularly additional explanation of why impacts in Canada are not analyzed in this EIS, including information about the Canadian review process for the Hydro-Québec project in Canada) • Updated discussion of Section 106 of the National Historic Preservation Act compliance process
Chapter 2. Alternatives	<ul style="list-style-type: none"> • Updated description of alternatives considered in detail based on new design information provided by the Applicant for Alternative 7 • Added complete description of Alternative 7 – Proposed Action • Added rationale for elimination for several alternatives, including “Underground Transmission Cable with 1,200 MW Capacity,” “Underground Transmission Cable in Railroad and Connecting Roadway Corridors,” “Use the National Grid Phase I/II Route,” “Other Transmission Projects,” “Power Generation Alternatives,” “Energy Conservation,” “Relocate Proposed Project Terminus Substation” • Added alternative considered but eliminated from further detailed analysis “Alternative Border Crossing” • Updated Summary of Potential Impacts Associated with the Project based on updated analysis • Updated the description of Alternative 7 to better clarify the details regarding the size and location of the converter and transition stations of Alternative 7 • Updated revised assumptions regarding the installation of underground cable in roadways
Chapter 3. Affected Environment	
Visual Resources	<ul style="list-style-type: none"> • Added discussion about seven new key observation points • Updated quantification of existing visual impact of the PSNH transmission line • Updated information about scenic roads in the study area

Table L-5. Summary of Substantive Changes to the Draft EIS

Resource or EIS Chapter	Revision(s) to the Draft EIS
Socioeconomics	<ul style="list-style-type: none"> Updated population, tax, employment, and tourism statistics Updated discussion of electricity system infrastructure in the ISO-NE region
Recreation	<ul style="list-style-type: none"> Updated to include analysis of the Cohos Trail
Health and Safety	<ul style="list-style-type: none"> Updated information about worker safety statistics
Traffic and Transportation	<ul style="list-style-type: none"> Updated to include information about airfields proximate to the Alternative 7 study area Added information about roadways in Canaan, VT
Land Use	<ul style="list-style-type: none"> No changes were made to this section
Noise	<ul style="list-style-type: none"> Updated quantification of noise receptors in the study area for all alternatives
Historic and Cultural Resources	<ul style="list-style-type: none"> Updated discussion of the methods of analysis, including coordination with the Section 106 of the National Historic Preservation Act compliance process Updated description of the area of potential effect to account for Canaan, VT Updated quantification of existing resources within the area of potential effect
Environmental Justice	<ul style="list-style-type: none"> Updated demographic statistics
Air Quality	<ul style="list-style-type: none"> Added discussion of the New Hampshire Climate Action Plan Updated information on emissions in the ISO-NE region
Wildlife	<ul style="list-style-type: none"> Updated list of species considered based on revised 2015 NH Wildlife Action Plan data (NHFG 2015) Updated discussion of Eastern brook trout Updated discussion of migratory bird habitat
Vegetation	<ul style="list-style-type: none"> Added discussion of licorice goldenrod Updated discussion of vegetated habitats in the study area Updated discussion of potential listed species habitat based on Natural Heritage Bureau data (NHB 2014)
Water Resources	<ul style="list-style-type: none"> Added discussion of public water supply resources in the study area Added discussion of water resources in Canaan, VT
Geology and Soils	<ul style="list-style-type: none"> Updated information about bedrock geology in the study area
Chapter 4. Environmental Impacts	
Visual Resources	<ul style="list-style-type: none"> Updated quantification of visual impacts for all alternatives, including viewshed area, scenic impact, and roads-based analysis Added viewpoint assessment discussion from seven new key observation points, with associated visual simulations Added discussion of potential impacts in Canaan, VT Added discussion of potential transboundary impacts near the border crossing in Canada resulting from the Project in the U.S., and impacts in the U.S. near the border crossing resulting from the Project in Canada Updated analysis of potential visibility in Concord, NH Updated analysis of potential impacts of AC system upgrades based on additional project design details

Table L-5. Summary of Substantive Changes to the Draft EIS

Resource or EIS Chapter	Revision(s) to the Draft EIS
Socioeconomics	<ul style="list-style-type: none"> • Updated quantification of potential economic impacts (including Project cost, employment, and taxes) based on revised project design and location details • Updated methods for determining potential impacts to property value, and updated quantification of these potential impacts • Updated quantification of potential impacts to wholesale electricity costs (in NH and the ISO-NE region) based on updated electricity market conditions
Recreation	<ul style="list-style-type: none"> • Updated to include analysis of the Cohos Trail
Health and Safety	<ul style="list-style-type: none"> • Added clarification that the Project would not interfere with other utilities • Updated analysis of the potential for electric shocks to clarify that compliance with the National Electrical Safety Code would avoid or minimize health and safety risks from electrical shocks
Traffic and Transportation	<ul style="list-style-type: none"> • Added discussion of impacts to roadways in Canaan, VT • Updated quantification of potential traffic impacts
Land Use	<ul style="list-style-type: none"> • No changes were made to this section
Noise	<ul style="list-style-type: none"> • Clarified the methods used for measuring noise impact • Added discussion of potential impacts on property values resulting from noise • Updated quantification of noise receptors potentially impacted • Updated discussion about ambient noise
Historic and Cultural Resources	<ul style="list-style-type: none"> • Updated and clarified discussion of coordination with the Section 106 of the National Historic Preservation Act compliance process • Updated quantification of potentially-impacted resources based on revised project design and location details • Clarified that the ANST would be crossed by all alternatives
Environmental Justice	<ul style="list-style-type: none"> • No changes were made to this section
Air Quality	<ul style="list-style-type: none"> • Updated quantification of potential emissions in the ISO-NE region during construction and operation • Updated quantification of impacts to carbon sequestration potential resulting from vegetation removal • Updated discussion of potential air quality impacts related to AC system upgrades
Wildlife	<ul style="list-style-type: none"> • Updated analysis to include impacts to new state-listed wildlife species • Updated analysis to include information presented in the 2015 New Hampshire Wildlife Action Plan (NHFG 2015) • Updated analysis of potential impacts to aquatic habitat resulting from vegetation removal • Updated quantification of potential habitat impacts based on revised project design and location details • Updated Endangered Species Act determinations for threatened and endangered species based on consultation with the U.S. Fish and Wildlife Service

Table L-5. Summary of Substantive Changes to the Draft EIS

Resource or EIS Chapter	Revision(s) to the Draft EIS
Vegetation	<ul style="list-style-type: none"> • Updated analysis of potential impacts to listed species based on Natural Heritage Bureau data (NHB 2014), and the 2015 New Hampshire Wildlife Action Plan (NHFG 2015) • Added discussion of successional habitat and high-elevation spruce fir communities • Updated quantification of potential habitat impacts based on revised project design and location details
Water Resources	<ul style="list-style-type: none"> • Added analysis of potential impacts to public water supply resources • Updated analysis of wetland impacts to present information in different categories • Added discussion of potential impacts in Canaan, VT • Updated quantification of potential impacts to water resources based on revised project design and location details
Geology and Soils	<ul style="list-style-type: none"> • Updated quantification of potential impacts to water resources based on revised project design and location details
Chapter 5. Cumulative and Other Impacts	<ul style="list-style-type: none"> • Added analysis of potential cumulative impacts from Jericho Power Wind, Future Wind Projects, the Eversource Energy/National Grid AC Plan, Planned Natural Gas Pipeline Projects, and the Massachusetts Clean Energy RFP Transmission Projects • Updated analysis of potential cumulative impacts on ISO-NE region emissions • Added analysis of potential cumulative impacts to high-elevation forests
Chapter 6. List of Preparers	<ul style="list-style-type: none"> • Updated with information on additional preparers
Chapter 7. References	<ul style="list-style-type: none"> • Add references for new information in final EIS
Chapter 8. Glossary	<ul style="list-style-type: none"> • No changes were made to this section
Chapter 9. Index	<ul style="list-style-type: none"> • Updated index to reflect final EIS
Appendix A. Maps	<ul style="list-style-type: none"> • Updated to reflect revised project design information
Appendix B. Scoping Issue Statements	<ul style="list-style-type: none"> • Clarified that this content is specific to comments received during the public scoping process, not the draft EIS public review period • Added information about the Canadian review process for the Hydro-Québec project in Canada
Appendix C. Proposed Forest Plan Amendments	<ul style="list-style-type: none"> • No changes were made to this section
Appendix D. Cumulative Effects Projects	<ul style="list-style-type: none"> • Added Future Wind Projects and Massachusetts Clean Energy RFP Transmission Projects • Clarified list of potentially-affected resources for each project
Appendix E. Key Observation Point Visual Simulations	<ul style="list-style-type: none"> • Added visual simulations for seven additional key observation points
Appendix F. Forest Plan Consistency Analysis	<ul style="list-style-type: none"> • Updated to include information about consistency of Alternative 7 with the Forest Plan
Appendix G. ESA Section 7 Consultation	<ul style="list-style-type: none"> • Updated to refer to full list of consultation documentation on the EIS website
Appendix H. Applicant-Proposed Impact Avoidance and Minimization Measures	<ul style="list-style-type: none"> • Updated to clarify the applicability of measures required by other permitting agencies (e.g., the New Hampshire SEC) • Updated to include additional measures intended to minimize impacts at the ANST crossing

Northern Pass Transmission Line Project NOAs Published
in the *Federal Register*

Authorization to Issue Securities of AEP Generating Company.

Filed Date: 7/24/15.

Accession Number: 20150724–5096.

Comments Due: 5 p.m. ET 8/14/15.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: July 24, 2015.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP15–535–000]

National Fuel Gas Supply Corporation; Notice of Request Under Blanket Authorization

Take notice that on July 17, 2015, National Fuel Gas Supply Corporation (National Fuel) 6363 Main Street, Williamsville, New York 14221, filed in Docket No. CP15–535–000 a prior notice request pursuant to sections 157.205 and 157.216 of the Commission's regulations under the Natural Gas Act for authorization to abandon certain minor underground natural gas storage facilities within the Colden Storage Field in Erie County, New York, under its blanket certificate issued in Docket No. CP83–4–000, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the Web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOnlineSupport@

ferc.gov or toll free at (866) 208–3676, or TTY, contact (202) 502–8659.

Any questions concerning this application may be directed Kenneth E. Webster, Attorney for National Fuel, 6363 Main Street, Williamsville, New York 14221, at (716) 857–7067.

Specifically, National Fuel proposes to abandon three observation wells: 1013–I, 1028–I and 1229–I (within the Colden Storage Field).

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Any person may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention. Any person filing to intervene or the Commission's staff may, pursuant to section 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) file a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (www.ferc.gov) under the "e-Filing" link.

Dated: July 27, 2015.

Kimberly D. Bose,
Secretary.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Aircraft Engines—Supplemental Information Related to Exhaust Emissions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "Aircraft Engines—Supplemental Information Related to Exhaust Emissions" (EPA ICR No. 2427.03, OMB Control No. 2060-0680) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR. Public comments were previously requested via the **Federal Register** during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 31, 2015.

ADDRESSES: Submit your comments, referencing the above listed Docket ID Number, to (1) EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oir_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any

personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Alan Stout, Office of Air and Radiation, U.S. Environmental Protection Agency; telephone number: 734-214-4805; email address: stout.alan@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: Clean Air Act section 231 (42 U.S.C. 7571) authorizes EPA to adopt emission standards for aircraft engines. The Clean Air Act additionally provides broad authority for EPA to collect information related to the regulations we adopt for aircraft and other emission sources (42 U.S.C. 7414(a)(1)). EPA is accordingly adopted emission standards for aircraft gas turbine engines and added a requirement for manufacturers to submit information related to compliance with the emission standards. EPA will use the data to verify compliance with emission standards and to better understand the characteristics of aircraft engines that are subject to emission standards.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 10 (total).

Frequency of response: Annual.

Total estimated burden: 60 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: No annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in the total estimated respondent burden compared with the ICR currently approved by OMB.

Courtney Kerwin,

Director, Collection Strategies Division.

Adequacy Determination for the Grants Pass, Oregon PM₁₀ State Implementation Plan for Transportation Conformity Purposes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of adequacy determination.

SUMMARY: The Environmental Protection Agency (EPA) is notifying the public of its finding that the Grants Pass, Oregon second 10-year limited maintenance plan (LMP) for particulate matter with an aerodynamic diameter of a nominal 10 microns or less (PM₁₀) is adequate for transportation conformity purposes. The LMP was submitted to the EPA by the State of Oregon Department of Environmental Quality (ODEQ or the State) on April 22, 2015. As a result of our adequacy finding, regional emissions analyses will no longer be required as part of the transportation conformity demonstrations for PM₁₀ for the Grants Pass area.

DATES: This finding is effective August 17, 2015.

FOR FURTHER INFORMATION CONTACT: The finding will be available at the EPA's conformity Web site: <http://www.epa.gov/otaq/stateresources/transconf/adequacy.htm>. You may also contact Dr. Karl Pepple, U.S. EPA, Region 10 (OAWT-107), 1200 Sixth Ave., Suite 900, Seattle, WA 98101; (206) 553-1778; or by email at pepple.karl@epa.gov.

SUPPLEMENTARY INFORMATION: This action provides notice of the EPA's adequacy finding regarding the second 10-year PM₁₀ limited maintenance plan (LMP) for the Grants Pass area for purposes of transportation conformity. The EPA's finding was made pursuant to the adequacy review process for implementation plan submissions delineated at 40 CFR 93.118(f)(1) under which the EPA reviews the adequacy of a state implementation plan (SIP) submission prior to the EPA's final action on the implementation plan.

The State submitted the LMP to the EPA on April 22, 2015. Pursuant to 40 CFR 93.118(f)(1), the EPA notified the public of its receipt of this plan and its review for an adequacy determination on the EPA's Web site and requested public comment by no later than June 3, 2015. The EPA received no comments on the plan during the comment period. As part of our analysis, we also

To submit comments, or access the docket, please follow the detailed instructions provided under **ADDRESSES** in the **Federal Register** document of September 25, 2015. If you have questions on individual chemicals, consult the person listed in the Table.

Authority: 7 U.S.C. 136 *et seq.*

FEDERAL COMMUNICATIONS COMMISSION

Communications Security, Reliability, and Interoperability Council; Notice of Public Meeting

AGENCY: Federal Communications Commission.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice advises interested persons that the Federal Communications Commission's (FCC or Commission) Communications Security, Reliability, and Interoperability Council (CSRIC) V will hold its third meeting.

DATES: December 3, 2015.

ADDRESSES: Federal Communications Commission, Room TW-C305 (Commission Meeting Room), 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT:

Jeffery Goldthorp, Designated Federal Officer, (202) 418-1096 (voice) or jeffery.goldthorp@fcc.gov (email); or Suzon Cameron, Deputy Designated Federal Officer, (202) 418-1916 (voice) or suzon.cameron@fcc.gov (email).

SUPPLEMENTARY INFORMATION: The **Federal Register** Notice of the December 3, 2015, meeting of the Federal Communications Commission's Communications Security, Reliability, and Interoperability Council (CSRIC) was published less than 15 days prior to that meeting. While the publication did not meet the 15-day requirement for advance publication, exceptional circumstances warrant proceeding with the December 3, 2015, meeting. Specifically, a significant number of CSRIC members have made business and travel plans to attend the CSRIC meeting on December 3; there is no other date within one month of December 3, 2015, that will accommodate CSRIC members' schedules; and delaying the meeting will also cause undue financial burdens on many of the CSRIC members who have made travel arrangements.

The CSRIC is a Federal Advisory Committee that will provide recommendations to the FCC regarding best practices and actions the FCC can take to help ensure the security, reliability, and interoperability of

MORTGAGEE'S NOTICE OF SALE OF REAL PROPERTY

By virtue of a Power of Sale contained in a certain mortgage given by **Jeffrey L. Pepper and Rhonda M. Pepper** ("the Mortgagor(s)") to Mortgage Electronic Registration Systems, Inc., dated August 22, 2011 and recorded with the Strafford County Registry of Deeds at Book 3952, Page 0209 as affected by a modification agreement recorded with said Registry at Book 4137, Page 675 (the "Mortgage"), which mortgage is held by Lakeview Loan Servicing, LLC, the present holder of said Mortgage, pursuant to and in execution of said power and for breach of conditions of said Mortgage and for the purposes of foreclosing the same will sell at:

Public Auction
on
Tuesday, November 17, 2015
at
9:00 a.m.

Said sale being located on the mortgaged premises and having a present address of 4 Primrose Lane, Somersworth, Strafford County, New Hampshire. The premises are more particularly described in the Mortgage.

For mortgagor(s)' title see deed recorded with the Strafford County Registry of Deeds in Book 3952, Page 207.

NOTICE

PURSUANT TO NEW HAMPSHIRE RSA 479:25, YOU ARE HEREBY NOTIFIED THAT YOU HAVE A RIGHT TO PETITION THE SUPERIOR COURT FOR THE COUNTY IN WHICH THE MORTGAGED PREMISES ARE SITUATED, WITH SERVICE UPON THE MORTGAGEE, AND UPON SUCH BOND AS THE COURT MAY REQUIRE TO ENJOIN THE SCHEDULED FORECLOSURE SALE.

The Property will be sold subject to all unpaid real estate taxes and all other liens and encumbrances which may be entitled to precedence over the Mortgage. Notwithstanding any title information contained in this notice, the Mortgagee expressly disclaims any representations as to the state of the title to the Property involved as of the date of the notice of the date of sale. The property to be sold at the sale is "AS IS WHERE IS".

TERMS OF SALE

A deposit of Five Thousand (\$5,000.00) Dollars in the form of a certified check or bank treasurer's check or other check satisfactory to Mortgagee's attorney will be required to be delivered at or before the time a bid is offered. The successful bidder(s) will be required to execute a purchase and sale agreement immediately after the close of the bidding. The balance of the purchase price shall be paid within thirty (30) days from the sale date in the form of a certified check, bank treasurer's check or other check satisfactory to Mortgagee's attorney. The Mortgagee reserves the right to bid at the sale, to reject any and all bids, to continue the sale and to amend the terms of the sale by written or oral announcement made before or during the foreclosure sale. The description of the premises contained in said mortgage shall control in the event of an error in this publication.

Dated at Newton, Massachusetts, on October 16, 2015.

LEGAL NOTICE OF AVAILABILITY USDA - FOREST SERVICE

White Mountain National Forest
Coös, Grafton, Belknap, Merrimack,
and Rockingham counties.
New Hampshire
Northern Pass
Transmission Line Project
Draft Environmental
Impact Statement

The U.S. Department of Energy (DOE), Office of Electricity Delivery and Energy Reliability, has completed a Draft Environmental Impact Statement (EIS) analyzing the potential environmental effects of issuing a Presidential permit for the Northern Pass Transmission Line Project. The USDA Forest Service - White Mountain National Forest is a cooperating agency in the preparation of this EIS, and is reviewing an application for a special use permit. The permit would allow Northern Pass Transmission, LLC to construct, operate and maintain an electric power transmission line crossing portions of the White Mountain National Forest.

The Proposed Action would be a single circuit ±300 kilovolt (kV) HVDC transmission line running approximately 153 miles (246 km) from the U.S. border crossing with Canada in Pittsburg, NH, to a new direct current (DC)-to-alternating current (AC) converter station to be constructed in Franklin, NH. From Franklin, NH, to the Project terminus at the Public Service of New Hampshire's (PSNH's) existing Deerfield Substation located in Deerfield, NH. The Proposed Action would consist of 34 miles (55 km) of 345 kV AC electric transmission line. The total length of the Proposed Action would be approximately 187 miles (301 km). In total, the Proposed Action would be within the WMNF for approximately 11 miles (18 km) in the towns of Stark, Easton, Lincoln, and Woodstock, NH. All portions of the Proposed Action on the WMNF would be located in the existing PSNH transmission route.

A Notice of Availability was published in the Federal Register on July 31, 2015, initiating a 90-day comment period for the Draft EIS. The comment period has subsequently been extended and is now scheduled to close on December 31, 2015.

The draft EIS is available on the Northern Pass EIS project website (<http://www.northermpasseis.us/>). This website was created to provide the public with information about the project, including background details, public hearings, and project updates. A custom comment form is included on the website, which allows the public to submit comments on the Draft EIS electronically.

In addition to the project website, the document is available on-line at the DOE's NEPA website <http://nepa.energy.gov/draft-environmental-impact-statement-sh.htm>. Copies of the entire Draft EIS are available for public review at 30 local libraries and town halls. Copies and additional information can also be requested from Brian Mills, the National Environmental Policy Act (NEPA) Document Manager, at (202) 586-8267.

Comments on the Draft EIS can be submitted verbally during public hearings or in writing to Mr. Brian Mills at: Office of Electricity Delivery and Energy Reliability (OE-20), U.S. Department of Energy, 1000 Independence Avenue, SW, Washington DC 20583; or fax: (202) 586-8008. Comments can be hand delivered between the hours of 8:00 a.m. to 5:00 p.m., Monday-Friday, excluding holidays. The Forest Service encourages the public to submit comments via email to drafiEISComments@northermpasseis.us or on the project website at <http://www.northermpasseis.us/>. The following formats for electronic comments are acceptable: email message; plain text (.txt); rich text (.rtf); or Microsoft Word document (.doc). Please mark envelopes and electronic mail subject lines as "Northern Pass Draft EIS Comments." Written comments must be received by December 31, 2015.

This comment period is a designated opportunity for public participation. Only individuals or entities who submit timely and specific written comments (as defined by 36 CFR 218.2) about this proposed project during this or another designated public comment period will be eligible to file an objection. Other eligibility requirements are identified at 36 CFR 218.25(a)(3) and include name, postal address, title of the project, identity of the individual or entity who authored the comments, and signature or other verification of identity upon request.

MORTGAGEE'S SALE OF REAL ESTATE

By virtue of and in execution of the Power of Sale contained in a certain mortgage given by **Marlene Colageo** to Mortgage Electronic Registration Systems, Inc. acting solely as a nominee for Carrington Mortgage Services, LLC, dated August 14, 2014 and recorded with the Sullivan County Registry of Deeds in Book 1921, Page 967 of which mortgage J.P. Morgan Mortgage Acquisition Corp. is the present holder by assignment, for breach of conditions of said mortgage and for the purpose of foreclosing the same, the mortgaged premises located at **256 Center Road, Goshen, NH** will be sold at a Public Auction at **1:00PM on November 23, 2015**, being the premises described in the mortgage to which reference is made for a more particular description thereof. Said public auction will occur on the Mortgaged Premises.

A copy of the Mortgage may be examined by any interested person and any inquiries regarding the foreclosure sale may be made of the undersigned at Korde & Associates, P.C., 321 Billerica Road, Suite 210, Chelmsford, MA during regular business hours.

For mortgagor's title, see deed recorded with the Sullivan County Registry of Deeds in Book 1921, Page 965.

NOTICE TO THE MORTGAGOR AND ALL INTERESTED PARTIES: YOU ARE HEREBY NOTIFIED THAT YOU HAVE A RIGHT TO PETITION THE SUPERIOR COURT FOR THE COUNTY IN WHICH THE MORTGAGED PREMISES ARE SITUATED, WITH SERVICE UPON THE MORTGAGEE, AND UPON SUCH BOND AS THE COURT MAY REQUIRE, TO ENJOIN THE SCHEDULED FORECLOSURE SALE.

LIENS AND ENCUMBRANCES: The Mortgaged Premises shall be sold subject to any and all easements, unpaid taxes, liens, encumbrances and rights, title and interests of third persons of any and every nature whatsoever which are or may be entitled to precedence over the Mortgage.

NO WARRANTIES: The Mortgaged Premises shall be sold by the Mortgagee and accepted by the successful bidder "AS IS" AND "WHERE IS" and with all faults. Except for warranties arising by operation of law, if any, the conveyance of the Mortgaged Premises will be made by the Mortgagee and accepted by the successful bidder without any express or implied warranties whatsoever, including, without limitation, any representations or warranties with respect to title, possession, permits, approvals, recitation of acreage, hazardous materials and physical condition. All risk of loss or damage to the Mortgaged Premises shall be assumed and borne by the successful bidder immediately after the close of bidding.

TERMS OF SALE: To qualify to bid, bidders must register to bid and present to the Mortgagee or its agent the sum of Five Thousand Dollars and 00/100 (\$5,000.00) in cash or by certified check or other form of payment acceptable to the Mortgagee or its agent prior to the commencement of the public auction. The balance of the purchase price must be paid in full by the successful bidder in cash or by certified check within thirty (30) days from the date of the public auction, or on delivery of the foreclosure deed, at the option of the Mortgagee. The deposits placed by unsuccessful bidders shall be returned to those bidders at the conclusion of the public auction. The successful bidder shall execute a Memorandum of Foreclosure Sale immediately after the close of bidding. If the successful bidder fails to complete the purchase of the Mortgaged Premises, the Mortgagee may, at its option, retain the deposit as liquidated damages.

RESERVATION OF RIGHTS: The Mortgagee reserves the right to (i) cancel or continue the foreclosure sale to such subsequent date or dates as the Mortgagee may deem necessary or desirable, (ii) bid upon and purchase the Mortgaged Premises at the foreclosure sale, (iii) reject any and all bids for the Mortgaged Premises and (iv) amend or change the terms of sale set forth herein by announcement, written or oral, made before or during the foreclosure sale. Such change(s) or amendment(s) shall be binding on all bidders.

Other terms to be announced at sale.

NOTICE TO THE MORTGAGOR AND ALL INTERESTED PARTIES: YOU ARE HEREBY NOTIFIED THAT YOU HAVE A RIGHT TO PETITION THE SUPERIOR COURT FOR THE COUNTY IN WHICH THE MORTGAGED PREMISES ARE SITUATED, WITH SERVICE UPON THE MORTGAGEE, AND UPON SUCH BOND AS THE COURT MAY REQUIRE, TO ENJOIN THE SCHEDULED FORECLOSURE SALE.

LIENS AND ENCUMBRANCES: The Mortgaged Premises shall be sold subject to any and all easements, unpaid taxes, liens, encumbrances and rights, title and interests of third persons of any and every nature whatsoever which are or may be entitled to precedence over the Mortgage.

NO WARRANTIES: The Mortgaged Premises shall be sold by the Mortgagee and accepted by the successful bidder "AS IS" AND "WHERE IS" and with all faults. Except for warranties arising by operation of law, if any, the conveyance of the Mortgaged Premises will be made by the Mortgagee and accepted by the successful bidder without any express or implied warranties whatsoever, including, without limitation, any representations or warranties with respect to title, possession, permits, approvals, recitation of acreage, hazardous materials and physical condition. All risk of loss or damage to the Mortgaged Premises shall be assumed and borne by the successful bidder immediately after the close of bidding.

TERMS OF SALE: To qualify to bid, bidders must register to bid and present to the Mortgagee or its agent the sum of Five Thousand Dollars and 00/100 (\$5,000.00) in cash or by certified check or other form of payment acceptable to the Mortgagee or its agent prior to the commencement of the public auction. The balance of the purchase price must be paid in full by the successful bidder in cash or by certified check within thirty (30) days from the date of the public auction, or on delivery of the foreclosure deed, at the option of the Mortgagee. The deposits placed by unsuccessful bidders shall be returned to those bidders at the conclusion of the public auction. The successful bidder shall execute a Memorandum of Foreclosure Sale immediately after the close of bidding. If the successful bidder fails to complete the purchase of the Mortgaged Premises, the Mortgagee may, at its option, retain the deposit as liquidated damages.

RESERVATION OF RIGHTS: The Mortgagee reserves the right to (i) cancel or continue the foreclosure sale to such subsequent date or dates as the Mortgagee may deem necessary or desirable, (ii) bid upon and purchase the Mortgaged Premises at the foreclosure sale, (iii) reject any and all bids for the Mortgaged Premises and (iv) amend or change the terms of sale set forth herein by announcement, written or oral, made before or during the foreclosure sale. Such change(s) or amendment(s) shall be binding on all bidders.

Other terms to be announced at sale.
