AND ENERGY RELIABILITY  
WASHINGTON, DC**

**AUGUST 2017**

**Department of Energy**  
**Washington, DC 20585**  
August 2017

Dear Sir/Madam:

Enclosed is the final *Northern Pass Transmission Line Project Environmental Impact Statement* (DOE/EIS-0463) prepared by the Department of Energy (DOE) pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations.

The United States Forest Service (USFS) – White Mountain National Forest, United States Environmental Protection Agency (EPA) – Region 1, United States Army Corps of Engineers (USACE) – New England District, and the New Hampshire Office of Energy and Planning (NHOEP) are cooperating agencies in the preparation of the EIS.

The proposed DOE action in the final EIS is to issue a Presidential permit to the Applicant, Northern Pass LLC, to construct, operate, maintain, and connect a new electric transmission line across the U.S./Canada border in northern New Hampshire (NH).

DOE has prepared this final EIS to evaluate the potential environmental impacts in the United States of the proposed action and the range of reasonable alternatives, including the No Action alternative. Under the No Action alternative, the Presidential permit would not be granted, and the proposed transmission line would not cross the U.S./Canada border.

In addition to its Presidential permit application to DOE, Northern Pass LLC applied to the USFS for a special use permit that would authorize Northern Pass LCC to construct, own, operate and maintain an electric transmission line to cross portions of the White Mountain National Forest under its jurisdiction. The final EIS will be used by the Forest Supervisor of the White Mountain National Forest to inform the Record of Decision in regard to this requested use.

DOE will use the EIS to ensure that it has the information it needs for informed decision-making.

The final EIS will also be posted on the project EIS website, <http://www.northernpasseis.us/> and DOE's NEPA website at <https://energy.gov/nepa/listings/environmental-impact-statements-eis>.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Mills".

## COVER SHEET

**RESPONSIBLE FEDERAL AGENCY:** U.S. Department of Energy (DOE), Office of Electricity Delivery and Energy Reliability

**COOPERATING AGENCIES:** United States Forest Service (USFS) – White Mountain National Forest (WMNF); United States Environmental Protection Agency (EPA) – Region 1; United States Army Corps of Engineers (USACE) – New England District; and New Hampshire Office of Energy and Planning (NHOEP)

**TITLE:** Northern Pass Transmission Line Project Environmental Impact Statement (DOE/EIS-0463)

**LOCATION:** Coös, Grafton, Belknap, Merrimack, and Rockingham counties in New Hampshire

**CONTACTS:** For additional information on this Environmental Impact Statement (EIS) contact:

Mr. Brian Mills, National Environmental Policy Act (NEPA) Document Manager  
Office of Electricity Delivery and Energy Reliability, OE-20

Telephone: (202) 586-4600 or leave a message at (800) 472-2756

**ABSTRACT:** Northern Pass Transmission, LLC (Northern Pass) has applied to the DOE for a Presidential permit to construct, operate, maintain, and connect a 192-mile (309-km) electric transmission line across the United States (U.S.)/Canada border in northern New Hampshire (NH). This final EIS addresses the potential environmental impacts of the Project (Proposed Action), the No Action Alternative, and ten additional action alternatives (Alternatives 2 through 6, with variations). The NH portion of the Project would be a single circuit  $\pm 320$  kilovolt (kV) high voltage direct current (HVDC) transmission line running approximately 158 miles (254 km) from the U.S. border crossing with Canada in Pittsburg, NH, to a new direct current-to-alternating current (DC-to-AC) converter station to be constructed in Franklin, NH. From Franklin, NH, to the Project terminus at the Public Service of New Hampshire's existing Deerfield Substation located in Deerfield, NH, the Project would consist of 34 miles (55 km) of 345 kV AC electric transmission line. The total length of the Project would be approximately 192 miles (309 km).

**PUBLIC COMMENTS:** In preparing this final EIS, DOE considered comments received during the scoping period, which extended from February 11, 2011 to June 14, 2011, and was reopened from June 15, 2011 to November 5, 2013 (DOE accepted and considered all comments during the scoping period from February 11, 2011 to November 5, 2013), and the public comment period on the draft EIS (July 31, 2015 through April 4, 2016). Comments on the draft EIS were accepted during the 45-day period

following publication of EPA's Notice of Availability (NOA) in the *Federal Register* on July 31, 2015; the public comment period was extended until April 4, 2016 following publication of EPA's NOA of the supplement in the *Federal Register* on November 20, 2015. DOE held four public meetings on the draft EIS in Colebrook, NH on March 7, 2016; Waterville Valley, NH on March 9, 2016; Concord, NH on March 10, 2016; and Whitefield, NH on March 11, 2016. All comments were considered during preparation of this final EIS. Appendix L in Volume 3 of this EIS contains the comments received on the draft EIS and DOE's responses to these comments. This final EIS contains revisions and new information based in part on comments received on the draft EIS. Vertical bars in the margins marking changed text indicate the locations of these revisions and new information. Deletions are not indicated. Appendices J and K in Volume 2 and Appendix L in Volume 3 are entirely new parts of this EIS; therefore, they do not contain bars indicating changes from the draft EIS.

The EIS analyzes the potential environmental impacts of DOE issuing a Presidential permit for the proposed Northern Pass Project, which is DOE's proposed federal action. DOE will use the EIS to inform its decision on whether to issue a Presidential permit. Additionally, Northern Pass has applied to the USFS for a special use permit (SUP) authorizing Northern Pass to construct, operate, and maintain an electric power transmission line crossing portions of the WMNF. The WMNF Forest Supervisor will use the EIS to inform its decision regarding: 1) whether to issue a SUP under the Federal Land Policy and Management Act; 2) the selection of an alternative; 3) any need to amend the Forest Plan; and 4) what specific terms and conditions should apply if a SUP is issued.

Copies of the final EIS are available for public review at 30 local libraries and town halls, or a copy can be requested from Mr. Brian Mills. The EIS is also available on the Northern Pass EIS website (<http://www.northernpasseis.us/>). DOE will announce its decision on the Proposed Action in a Record of Decision (ROD) in the *Federal Register* no sooner than 30 days after the EPA publishes the NOA of the final EIS. The USFS will announce its draft decision on the Proposed Action in a draft ROD in the *Federal Register* shortly after the EPA publishes the NOA of the final EIS.

**APPENDIX L**  
**COMMENT RESPONSE DOCUMENT**

RE: Proposed Northern Pass Transmission Project

Mr. Mills:

In September 2015 the following petition was presented to the New Hampshire Site Evaluation Committee and the Public Utilities Commission in response to the amended route of Northern Pass' proposed transmission line. Now, more than six months later, the people of the Whitefield Community are still outraged that Northern Pass continues to propose above-ground lines through our town and community while proposing burial in other locations. 535 registered voters and concerned residents of Whitefield and surrounding towns signed the following petition requesting full burial of the Northern Pass transmission lines through Whitefield, should the project be approved. We now present a copy of this petition to the U.S. Department of Energy, in a show of opposition. This petition speaks for all those who stand against the proposed Northern Pass Transmission Project and the many harmful effects it would have on our community.

Signed,

Registered Voters and Concerned Residents of the Whitefield Community

0719-1

✓ Registered Voters

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.

WHITEFIELD CITIZENS' PETITION

To: Site Evaluation Committee  
 Governor Hassan  
 Senator Woodburn  
 Representatives Rideout and Tholl  
 Whitefield Selectboard  
 Whitefield Planning Board  
 Whitefield Economic Development Corporation

✓ Registered Voters

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.

These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.

 Whitefield Selectboard  
 Whitefield Planning Board  
 Whitefield Economic Development Corporation

✓ Registered Voters

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.
