Semi-Annual Report: April 2019

Facility Progress Report

On July 30, 2014, the Federal Energy Regulatory Commission (“Commission”) issued an order in Docket No. CP12-509-000 approving the Liquefaction Project. FLEX will utilize the Liquefaction Project in connection with the export authorization granted under DOE/FE Order Nos. 2913, 3066, 3282-C, 3357-B and 3957.

FLEX anticipates the first train of the Liquefaction Project will reach mechanical completion during the second quarter of 2019. Commissioning and startup of the first train is expected to be complete during the third quarter of 2019 to achieve sustained commercial operations. The second train is expected to commence commercial operations approximately six months after the first train, and the third liquefaction train is expected to commence commercial operations in the second quarter of 2020.

Status of Long-Term LNG Export Contracts

FLEX has executed long-term liquefaction tolling or LNG purchase and sale agreements with JERA Energy America, LLC, Osaka Gas Trading and Export, LLC, BP Energy Company, Toshiba America LNG Corporation, SK E&S LNG, LLC, Kansai Electric Power Co., Inc., and Trafigura PTE LTD under which FLEX will export LNG from the Liquefaction Project for itself or as agent for those counterparties. The required Summary Reports of the major provisions of each of these long-term contracts have been filed with DOE/FE.

Status of Long-Term Gas Supply Contracts

FLEX has not entered into long-term gas supply contracts associated with this project.

Date Facility is Expected to Be Operational

As described in more detail above, the first train of the Liquefaction Project is expected to commence commercial operations in the third quarter of 2019, with full three-train commercial operations in the second quarter of 2020.
