# NUCLEAR ENERGY INNOVATION CAPABILITIES ACT (NEICA)

*NEICA eliminates some of the financial and technological barriers standing in the way of nuclear innovation. The bill aims to speed up the development of advanced reactors in the United States and ensures America maintains its global leadership.*

## **Fast neutron source testing facility**

*Authorizes U.S. Department of Energy (DOE) to develop a fast neutron source test reactor.*

## **Cutting regulatory costs**

*Calls for a cost-share grant program to cover a portion of the licensing fees charged by the U.S. Nuclear Regulatory Commission during its review process for new reactor technologies.*

## **Advanced reactor demonstrations**

*Directs the Department to facilitate the siting of advanced reactor research demonstration facilities through private-public partnerships.*

## **High performance computing**

*Expand national lab high-performance computing capabilities to accelerate research on advanced nuclear technologies.*
