Project Title: H-Area Process Cooling Water Chemical Treatment Skid

Program or Field Office: Savannah River Site

Location(s) (City/County/State): Aiken/Aiken/South Carolina

Proposed Action or Project Description:

This activity installs a new vendor-designed, skid-mounted chemical feed system adjacent to the north side of the 285-11H Cooling Tower return flume per X-FCR-H-00001 (Rev.1) (attached). This new system is intended to replace the existing brominator system located on the 285-H basin pump deck. The skid will contain two 1,050 gallon double-walled tanks. One tank will contain ChemTreat CL49 (bromine and chlorine based biocide), and one tank will contain ChemTreat BL1302 (25% sodium hydroxide). These chemicals will replace ChemTreat C2189T and the dry soda ash currently being added to the cooling water. The skid will tie directly into the cooling water return header and the cooling water flume between the 285-11H tower and the 285-H basin. The skid will also contain metering pumps, sampling piping, analyzers, and instrumentation, all of which will be housed inside a leak-tight control enclosure.

Categorical Exclusion(s) Applied:

B1.5 - Existing steam plants and cooling water systems

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).

- There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- This proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 concerning limitations on actions during preparation of an environmental impact statement.
- All of the conditions that are integral elements of the classes of actions in Appendix B to Subpart D of 10 CFR Part 1021 would be met. This proposal would not threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of Appendix B to Subpart D of 10 CFR Part 1021; involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements.

Based on my review of information conveyed to me and in my possession (or attached) concerning the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
