

DOE Memo on the Retroactive Application of DOE-Listed Software Validated against RESNET 001-2020
8/26/2020

DOE has received questions on the retroactive application of DOE-listed software validated against RESNET 001-2020, used for 45L tax credit certifications. This memo adds clarification to the prior memo “Updated RESNET Software Validation Procedures” (7/24/2020).

DOE is currently accepting submissions for review of software that has been validated against RESNET Publication No. 001-20. DOE will continue to accept for review software validated against RESNET Publication 001-20 until further notice.

DOE approved software validated against RESNET Publication No. 001-2020 may be used to certify eligible homes for the 45L tax credit that were sold or leased to another person on or after 1/1/2020, but not homes sold or leased before this date.

DOE may update these software requirements in the future to accommodate future revisions to the RESNET 001 publication or changes to the 45L requirements.
