#### **New DOE Health and Home Performance Infographic**

The Better Buildings Residential Network launched a new Health + Home Performance Infographic that illustrates the link between efficiency and health to better engage homeowners. Efficiency and also home health programs and contractors can use the infographic's easy-to-follow question-and-answer format to discover a homeowner's needs.

The infographic is ideal for the "kitchen table" conversations where people decide what to do -- and who they want to do it. It also has links for homeowners to find a qualified contractor if they do not already have one.

[CLEAResult Home Upgrades](#)

[Efficiency Maine Home Upgrades](#)

[Network Partner Recognition](#)

The DOE [Home Energy Score™](#) team recognized three of its partners this month for their outstanding efforts to provide homeowners and renters with a Home Energy Score—a miles per gallon-type rating that measures a home's energy efficiency. Award winners include the [City of Portland Bureau of Planning and Sustainability](#), which produced nearly 6,000 scores over the past year; Detroit-based [Walker-Miller Energy Services](#), which used the score to reach underserved households in Michigan; and [Energize Connecticut](#), which helped lead Connecticut's innovative efforts to expand Home Energy Score, including to renters. Currently [25 Home Energy Score Partners](#) exist with a network of nearly 300 assessors actively producing scores nationwide.

## U.S. DEPARTMENT OF ENERGY Home Energy Score™

The latest improvement to [Home Energy Score™](#) enhances the tool's modeling capabilities by incorporating [EnergyPlus™](#), a whole-building energy simulation already considered the standard by engineers, architects, and researchers for measuring energy consumption in buildings. [The switch to EnergyPlus](#) enables Home Energy Score to produce more accurate energy estimates through comprehensive modeling calculations.

### Map Offers Details of Energy Efficiency Careers

An [interactive career map](#) funded by the DOE Building Technologies Office allows job seekers to explore 55 energy efficiency careers and provides information such as salary range, education requirements and future opportunities. Developed by the Interstate Renewable Industry Council and other industry groups, the [Green Buildings Career map](#) targets a broad group of workers with a variety of skills and education levels, providing hundreds of potential pathways to jobs in the green building industry.

## CLEAResult Completes More Than 263,000 Home Energy Upgrades

The Better Buildings Residential Network asks members to report the number of annual upgrades they complete, as well as any associated benefits, through the [Reporting and Recognition Template](#), which is the only requirement of membership.

Thanks and many congratulations to Residential Network member [CLEAResult](#) for reporting the following accomplishments in fiscal year 2020: 263,284 home energy upgrades completed. Upgrades, direct installations, and benefits were delivered to homes in 22 states, with 20% of upgrades completed in low-income homes.

# CLEAResult®

## Efficiency Maine Completes 18,953 Upgrades

Also, congratulations to Better Buildings Residential Network member [Efficiency Maine](#), which reported 18,953 home energy upgrades in fiscal year 2020. Their residential customers are able to leverage a variety of programs, including Home Energy Savings, Low Income Initiatives, Retail Initiatives, and Distributor Initiatives.

## Partner Recognition

The [Better Buildings Residential Network](#) welcomes its newest members: [Samsung](#), [Urban Institute](#), the [University of Notre Dame](#), [Wellness Smart Homes Association](#), Design by Trina, Energy Fit Buildings, and Cause Sustainability to the Network! If your organization is not yet a member, click [here](#) to join.

## Quick Quiz

According to the [Energy Information Administration](#), what percentage of U.S. homes used natural gas in 2015? (Answer at bottom.)

- A. 38%
- B. 48%
- C. 58%
- D. 68%
