Re: In the Matter of Freeport LNG Expansion, L.P. et al.
FE Docket No. 21-98-LNG
Application for Long-Term Authorization to Export Liquefied Natural Gas to
Non-Free Trade Agreement Nations

Dear Ms. Sweeney,

On behalf of the Center for Liquefied Natural Gas (CLNG), I hereby write to support the request in the above referenced docket of Freeport LNG Expansion, L.P., FLNG Liquefaction, LLC, FLNG Liquefaction 2, LLC and FLNG Liquefaction 3, LLC (collectively "Freeport LNG") to the U.S. Department of Energy to increase export capacity at their LNG Liquefaction and Export Terminal in Brazoria County, Texas.

LNG exports have and will continue to stabilize U.S. natural gas production, which in turn generates billions of dollars in new investments, benefiting local communities, producing tax revenues, and creating jobs.¹ Moreover, LNG exports are key to national and international efforts to reduce emissions, with global facilities investing billions in low-carbon and no-carbon solutions. Internationally, LNG exports support our allies' efforts to reach net-zero emissions, allowing them to generate electricity with natural gas versus higher-emitting energy sources.

For these reasons, we hereby support Freeport LNG's export capacity increase request and ask that you move quickly to grant such request, as local, national, and global communities stand to greatly benefit from the approval of Freeport LNG's application. Thank you for your consideration.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charlie Riedl".

Charlie Riedl, Executive Director
900 17th Street, NW, Suite 500
Washington, DC 20003

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full value chain, including LNG producers, shippers, terminal operators and developers. For more information, please visit www.lngfacts.org.
