

RECORD OF CATEGORICAL EXCLUSION DETERMINATION

Trafigura Trading LLC Docket EA-491

PROPOSED ACTION: Trafigura Trading LLC (Trafigura or Applicant) applied to the United States Department of Energy (DOE) Office of Electricity for an electricity export authorization to export electricity to Mexico pursuant to Section 202(e) of the Federal Power Act.¹ Trafigura is a Delaware limited liability company with its principal place of business in Houston, Texas. The Applicant represents that it “does not directly or indirectly own, operate or control any electric generation facilities, electric transmission facilities, distribution facilities, or inputs to electric power production.”² Trafigura proposes to use existing authorized international electric transmission facilities that are appropriate for open access by third parties.³

Trafigura is applying as a power marketer to obtain an export authorization to sell electric energy into Mexico for a term of five years or such longer period as determined by DOE. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. The Presidential permit for these facilities was issued by DOE after an appropriate level of NEPA review.

CX TO BE APPLIED: The elements identified above fit within the class listed in Appendix B to Subpart D, of Part 1021-Categorical exclusions applicable to specific agency actions. Specifically:

B4.2 Export of electric energy as provided by Section 202(e) of the Federal Power Act over existing transmission systems or using transmission systems that are themselves categorically excluded.

10 C.F.R. Part 1021, App. B to Subpart D, § B4.2.

REGULATORY REQUIREMENT: The proposed action has previously been determined by DOE to not have a significant effect on the human environment either individually or cumulatively. Authorizing the proposed action will not (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, including DOE and/or Executive orders; (2) require siting of new facilities or expansion of existing facilities; (3) disturb hazardous substances, pollutants, or contaminants; or (4) adversely affect environmentally sensitive resources.

DETERMINATION: Based on my review of the above information concerning the proposed action, as NEPA Compliance Officer (as authorized under DOE Policy 451.1), I have determined that the proposed action fits within the specified class of actions, other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

¹ 16 U.S.C. § 824a(e).

² Application of Trafigura Trading LLC for Authorization to Export Electricity from the United States to Mexico (Aug. 18, 2021) at 4.
