Re: In the Matter of Freeport LNG Expansion, L.P. et al.  
FE Docket No. 21-98-LNG  
Application for Long-Term Authorization to Export Liquefied Natural Gas to  
Non-Free Trade Agreement Nations

Dear Ms. Sweeney,

On behalf of the Natural Gas Supply Association (NGSA), I hereby write to support the request in the above referenced docket of Freeport LNG Expansion, L.P., FLNG Liquefaction, LLC, FLNG Liquefaction 2, LLC and FLNG Liquefaction 3, LLC (collectively "Freeport LNG") to the U.S. Department of Energy to increase export capacity at their LNG Liquefaction and Export Terminal in Brazoria County, Texas.

LNG exports have and will continue to stabilize U.S. natural gas production, which in turn generates billions of dollars in new investments, benefiting local communities, producing tax revenues, and creating jobs.<sup>1</sup> Moreover, LNG exports are key to national and international efforts to reduce emissions, with global facilities investing billions in low-carbon and no-carbon solutions. Internationally, LNG exports support our allies' efforts to reach net-zero emissions, allowing them to generate electricity with natural gas versus higher-emitting energy sources.

For these reasons, we hereby support Freeport LNG's export capacity increase request and ask that you move quickly to grant such request, as local, national, and global communities stand to greatly benefit from the approval of Freeport LNG's application. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink that reads "Dena Wiggins".

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA maintains a deep focus on the regulatory issues that affect natural gas producer-marketers and has been involved in a substantive manner in every one of the Federal Energy Regulatory Commission's significant natural gas rulemakings since FERC's creation in 1977. For more information, please visit [www.ngsa.org](http://www.ngsa.org).
