Re: In the Matter of Freeport LNG Expansion, L.P. et al.  
FE Docket No. 21-98-LNG  
Application for Long-Term Authorization to Export Liquefied Natural Gas to  
Non-Free Trade Agreement Nations

Dear Secretary Granholm,

I am writing to express my support for the request in the above referenced docket of Freeport LNG Expansion, L.P., FLNG Liquefaction, LLC, FLNG Liquefaction 2, LLC and FLNG Liquefaction 3, LLC (collectively "Freeport LNG") to the U.S. Department of Energy to increase export capacity at their LNG Liquefaction and Export Terminal in Brazoria County, Texas.

As you know, LNG exports have and will continue to stabilize U.S. natural gas production, which in turn generates billions of dollars in new investments, benefiting local communities, producing tax revenues, and creating jobs. Moreover, LNG exports are critical to national and international efforts to reduce emissions, with global facilities investing billions in low-carbon and no-carbon solutions. Internationally, LNG exports support our allies by allowing them to generate electricity with natural gas versus higher-emitting energy sources.

For these reasons, I support Freeport LNG's export capacity increase request and respectfully ask for your expeditious review, as local, national, and global communities stand to greatly benefit from the approval of Freeport LNG's application. Thank you for your consideration of this matter.

Sincerely,

  
JOHN CORNYN  
United States Senator
