Proposed Action Title: University of Southern California -- STEAM: System Testbed, Evaluation, and Architecture Metrics

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Arlington, VA; Marina del Rey, CA; Los Angeles, CA

Proposed Action Description:

Funding will support the project team's information gathering and analysis efforts to develop a framework and testbed for evaluating the potential of proposed photonic and optoelectronic technologies to reduce overall power consumption in datacenters. Specifically, the project team will: (1) provide system-level modeling and simulation services to facilitate technology transition to ENLITENED teams for both commercial datacenter and HPC environments; (2) incorporate new hardware into the STEAM testbed; and (3) develop common workloads, metrics, and benchmarks to demonstrate the potential of ENLITENED technologies. If successful, the project team will provide active modeling and simulation support for ENLITENED performers, with support tailored to performer needs. The team will also deliver final quantitative benchmark results using program metrics to show potential of ENLITENED-enabled architectures, including opportunities for improvement on future system architectures.

Project activities will be conducted at existing facilities at University of Southern California (Los Angeles, CA; Marina del Rey, CA, and Arlington, VA). The proposed project activities under this award are limited exclusively to intellectual, academic, or analytical activities. The project team will not conduct physical experiments, prototype fabrication, demonstration projects, or similar activities under this award.

Categorical Exclusion(s) Applied:

A9 - Information gathering, analysis, and dissemination

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
