

# JOURNEY TO THE JOULE WORLD

WHILE JASMINE AND THE SPARK SQUAD SEARCH FOR JOULES AT THE POWER FAIR, PUT YOUR GOGGLES ON AND JOURNEY TO FIND JOULES IN ENERGY RESOURCES NEAR YOU! SNAP A PHOTO OF YOUR SOLAR, WATER, AND WIND JOULES SOARING AROUND THE NEIGHBORHOOD, POWERING YOUR DEVICES, OR TAGGING ALONG ON YOUR ADVENTURES. THEN SHARE THE PHOTO BY USING THE HASHTAG **#MYJOULEJOURNEY** AND TAGGING THE NATIONAL RENEWABLE ENERGY LABORATORY AND THE U.S. DEPARTMENT OF ENERGY ON **TWITTER AND INSTAGRAM** (@NREL AND @ENERGY).

ENERGY LIVES IN ALL KINDS OF PLACES! JOULES ARE A TYPE OF ENERGY THAT COME FROM SOURCES LIKE THE SUN, OCEAN, AND WIND. JOULES CAN BE CAPTURED AND THEN STORED IN BATTERIES, AND WHEN WE'RE READY TO USE ENERGY, THE JOULES TRAVEL THROUGH CABLES AND USE THEIR ENERGY AND EXCITEMENT TO POWER THINGS LIKE LIGHTBULBS, COMPUTERS, AND EVEN ELECTRIC CARS!
