

NEPA Categorical Exclusion Determination Form

Program or Field Office: U.S. Department of Energy (DOE) Office of Legacy Management (LM)

Project Title: Unmanned Aircraft Survey of Maybell West, Colorado, Disposal Site

Location: Maybell West, Colorado, Disposal Site; Uranium Mill Tailings Radiation Control Act (UMTRCA) Title II

Proposed Action or Project Description:

Perform aerial surveys that would be conducted by small unmanned aircraft systems (sUAS) at the Maybell West, Colorado, Disposal Site. Data collected from aerial surveys facilitate the long-term management of this disposal site. Targets would be placed on the ground surface by driving an object shorter than six inches in length into the ground using hand-powered tools. No mechanized equipment would be used. Targets would be placed to limit disturbance to native vegetation and potential wetlands to the extent possible. Milkweed plants would not be mowed or cut in an effort to minimize impacts to the monarch butterfly. Work would be planned for August or later to minimize impacts to nesting migratory birds. Targets would not be placed in any areas suspected of containing cultural resources.

No aviation activities would commence until required aviation safety plans are approved by a certified DOE Aviation manager and permission would be received from the LM site manager to proceed with aviation activities. The need to perform follow-up aerial surveys would depend, in part, upon the results of the baseline aerial survey. Follow-up aerial surveys would require new Aviation Safety Plans approved by a certified DOE Aviation Manager and the LM Site Manager.

There is potential need for access agreements for off-site access related to the installation of targets off-site, which would be obtained for any work that would occur off-site. Routine maintenance related to the use of ATVs, ground surveying, on-site fueling, vegetation management, and/or reoccurrence of the aerial surveys would also occur.

Categorical Exclusion(s) Applied:

- A.1 Routine DOE Business Actions
- B1.3 Routine Maintenance
- B1.24 Property Transfer
- B3.1 Site Characterization and Environmental Monitoring
- B.3.2 Aviation Activities [Click here to enter text.](#)

For the complete DOE National Environmental Policy Act (NEPA) regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of Title 10 *Code of Federal Regulations* Section 1021 (10 CFR 1021).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized by the LM Director per DOE Policy 451.1), I have determined that the proposed action fits within the specified classes of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
