Proposed Action Title: Hinetics, LLC -- Cryogen-free Ultra-high Field Superconducting Electric Motor (CRUISE Motor)

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Champaign, Illinois; Urbana, Illinois; Huntington Beach, California; Minneapolis, Minnesota

Proposed Action Description:

Funding will support the project team's small-scale research and development of a high power density, low total mass, electric machine to enable electrified aircraft propulsion systems up to 10 MW and larger, utilizing a superconducting machine design which eliminates the need for cryogenic auxiliary systems. Specifically, the project team will (1) design, develop, and test concept motors and cooling systems (2) make adjustments to designs based on testing; (3) assemble and test prototype motors; and (4) finalize motor plans based on testing results. If successful, the project will result in a high-efficiency, low-weight, electric motor that has a lower external heat output, reduced by a factor of 6 to 10, which will reduce fossil fuel combustion and greenhouse gas emissions.

Project activities will be conducted at existing facilities at Hinetics, LLC (Champaign, IL), University of Illinois at Urbana-Champaign (Urbana, IL), West Coast Solutions (Huntington Beach, CA) and University of Minnesota (Minneapolis, MN), designed for the applicable activities. Project tasks will be conducted in accordance with established safety and materials/waste management protocols and pursuant to applicable Federal, State, and local regulatory requirements. No modifications will be made to existing facilities to accommodate the proposed work.

Categorical Exclusion(s) Applied:

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
