Proposed Action Title: University of Delaware -- Energy Efficient Manufacturing of Lightweight Composite Architected Structures for Transportation Vehicles

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Newark, Delaware; Rolla, Missouri; Philadelphia, Pennsylvania

Proposed Action Description:

Funding will support the project team's small-scale research and development of a new composite forming route, Composite Architected Materials Processing (CAMP), enabling a rapid economic fabrication process of composite architected structures. Specifically, the project team will (1) design, fabricate, verify, and test material selection and system products, (2) develop and fabricate components for prototype testing, and (3) finalize system and components for future supply-chain adoption. If successful, this project will result in CAMP products that would greatly reduce the energy intensity of carbon fiber composites manufacturing (20% compared to current state of the art [SOA] composite manufacturing energy intensity), drive down the total cost (65% compared to current SOA composite cost), and reduce weight (40-60% compared to solid composite, and up to 80% compared to current car weight), expanding the use of composites as primary structural components for vehicle applications.

Project activities will be conducted at existing facilities at University of Delaware (Newark, DE), Missouri University of Science and Technology (Rolla, MO), Temple University (Philadelphia, PA), and CarbonForm (Newark, DE) designed for the applicable activities. Project tasks will be conducted in accordance with established safety and materials/waste management protocols and pursuant to applicable Federal, State, and local regulatory requirements. No modifications will be made to existing facilities to accommodate the proposed work.

Categorical Exclusion(s) Applied:

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

B3.15 - Small-scale indoor research and development projects using nanoscale materials

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of [10 CFR Part 1021](#).

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
