

TABLE OF CONTENTS

Preface

National Petroleum Council	1
Study Request and Objectives	1
Study Organization	2
Study Scope	2
Study Approach	5
Report Structure	5

Executive Summary

Introduction	7
Key Findings of This Study	9
U.S. Oil and Natural Gas Production	10
Crude Oil Production.....	10
Future Oil Production.....	11
Natural Gas Production.....	11
Future Natural Gas Production.....	12
Value of the U.S. Oil and Natural Gas Industry.....	12
U.S. Oil and Natural Gas Demand	14
U.S. Petroleum Liquids Demand.....	14
U.S. Natural Gas Demand.....	14
Global Energy Demand.....	16
Necessity of Adequate Infrastructure	17
Oil Production Geographic Shifts.....	17
Natural Gas Production Geographic Shifts.....	18
Crude Oil, Natural Gas, and NGL Takeaway Capacity Limitations.....	18

U.S. Oil and Natural Gas Opportunities	18
Oil Exports.....	20
Natural Gas Exports.....	21
Port and Waterway Capacity.....	21
Skilled Labor Required.....	22
Consequences of Limits on Infrastructure Development.....	22
Energy System Resiliency	23
Oil and Liquids Transportation.....	23
Natural Gas Transportation.....	23
Resiliency.....	24
Complexity of the Permitting Process	25
Federal Requirements.....	25
Permitting Challenges.....	26
State and Local Government Role.....	27
U.S. Army Corps of Engineers.....	30
Permitting Improvement Initiatives	31
Stakeholder Engagement	33
American Indian and Alaska Native Tribes.....	33
Community Engagement.....	34
Permitting and Climate Change	35
Technology Advancements to Improve Transportation Safety	37
Oil and Natural Gas Pipelines.....	37
Underground Natural Gas and Gas Liquids Storage Facilities.....	38
LNG Shipping and Terminals.....	39
Marine.....	40
Rail.....	40
Trucking.....	41
Cybersecurity	43
Summary of Executive Summary Recommendations	44

Chapter One: Supply and Demand

- I. Introduction**.....1-1
- II. Supply**.....1-2
 - A. Historical Trends.....1-2
 - B. Factors That Shape Oil and Natural Gas Production.....1-6
 - 1. Supply Outlooks Used in This Study.....1-6
 - 2. U.S. Crude Oil Production Outlooks to 2040.....1-9
 - a. Importance of Export Infrastructure and Access to Export Markets.....1-9
 - b. U.S. Crude Oil Export Infrastructure.....1-10
 - c. Size of the U.S. Crude Oil and Natural Gas Resource Base.....1-10
 - d. Crude Oil Production Outlooks for Select Subnational Areas.....1-11
 - 3. U.S. Natural Gas Production Outlooks to 2040.....1-15
 - a. Natural Gas Production Outlooks to 2040 for Select Subnational Areas.....1-17
 - 4. U.S. NGL Production Outlooks to 2040.....1-21
 - a. Appalachian Basin (Marcellus and Utica) NGL Production.....1-23
 - b. Permian Basin NGL Production.....1-23
 - c. Other Basin-Level NGL Production.....1-26
- III. Demand**.....1-26
 - A. Summary.....1-26
 - B. Outlooks Reviewed.....1-26
 - C. World Energy Demand Growing.....1-29
 - D. U.S. Crude Oil and Refined Products Consumption.....1-31
 - 1. Crude Oil Demand for Refineries.....1-32
 - 2. Refined Products.....1-35
 - a. Gasoline, Including Ethanol.....1-36
 - b. Distillate.....1-41
 - c. Jet Fuel.....1-45
 - d. Residual Fuel Oil.....1-47
 - E. Natural Gas.....1-50
 - 1. Demand for Natural Gas in the Power Sector.....1-53
 - 2. Natural Gas Demand by State.....1-55

3. Outlook.....	1-59
4. LNG Major Driver of Future Growth.....	1-60
5. U.S. LNG Exports.....	1-62
F. NGLs and Petrochemicals.....	1-64
1. NGLs.....	1-64
2. Petrochemicals.....	1-71
G. Carbon-Constrained Scenarios.....	1-73
1. U.S. Oil and Natural Gas Demand Under the IEA’s SDS.....	1-75
2. U.S. Oil and Natural Gas Demand in the Carbon Tax Scenarios.....	1-79
3. Carbon-Constrained Impacts per Sector.....	1-80
a. Electricity Sector.....	1-80
b. Transportation Sector.....	1-82
c. Other Sectors.....	1-83
IV. Summary of Findings.....	1-83

Chapter Two: Infrastructure Resiliency, Mapping, and Analysis

I. Introduction.....	2-1
II. The History, Evolution, and Current State of the U.S. Oil and Natural Gas Transportation Systems.....	2-2
A. Four Attributes That Determine Infrastructure Needs.....	2-2
1. Commodity – Type and Growth Trajectory.....	2-2
2. Market – Distance and Characteristics.....	2-3
3. Existing/Legacy Infrastructure.....	2-3
4. Infrastructure Development Environment.....	2-3
B. Crude Oil Infrastructure History and Current State.....	2-4
1. General Overview of Transportation System.....	2-4
a. Resiliency through Infrastructure Interconnectivity.....	2-4
b. Crude Oil Pipelines.....	2-5
c. Crude Oil Storage.....	2-6
2. History and Current State of the Crude Oil Transportation System.....	2-8
a. Major Flow Patterns.....	2-8
b. Impact of Canadian Imports.....	2-8

c.	Crude Oil Transportation Infrastructure in the Shale Era.....	2-8
d.	Impact of Shale on Domestic Crude Oil Transportation – Changing Regional Relationships.....	2-10
e.	Oil Flows Pre- and Post-Shale.....	2-11
f.	Bakken Development (2017 to 2018).....	2-11
g.	Rockies Development (2014 to 2018).....	2-14
h.	Midcontinent Inbound/Outbound Pipelines (2010 to 2018).....	2-15
i.	Midcontinent Crude Oil Pipeline Projects (2019 to 2024).....	2-15
j.	Eagle Ford Development (2010 to 2016).....	2-15
k.	Permian Basin Development (2010 to 2016).....	2-17
l.	Permian Basin Development (2017 to 2018).....	2-18
m.	Permian Basin Development (2019 to 2021).....	2-18
3.	Exports – Crude Oil.....	2-21
4.	Resiliency – Crude Oil Transportation System.....	2-21
C.	Refined Products Infrastructure History and Current State.....	2-24
1.	General Overview of Refining Systems.....	2-24
a.	Capacity and Utilization.....	2-24
b.	Feedstock Quality Specifications and the Importance of Global Trade.....	2-24
c.	Geographic Concentration.....	2-26
d.	Impact of Regulations on Refiners.....	2-28
2.	General Overview of Transportation System.....	2-28
3.	History and Current State.....	2-29
a.	Large-Diameter Pipelines for Inter-PADD Movements.....	2-33
b.	Small-Diameter Pipelines for Inter-PADD and Intra-PADD Movements.....	2-33
c.	Storage and Delivery Terminals.....	2-34
4.	Learning from the Past with a View of the Infrastructure Needs of the Future.....	2-36
5.	Exports – Refined Products.....	2-36
6.	Resiliency – Refined Fuels Transportation System.....	2-37
a.	Strengths.....	2-37
b.	Exposures.....	2-38
c.	Case Study: Colonial Pipeline Shutdown of 2016.....	2-39
D.	Natural Gas Infrastructure History and Current State.....	2-40
1.	General Overview of Transportation System.....	2-40
2.	History and Current State.....	2-40
a.	Natural Gas Pipelines.....	2-40
b.	Natural Gas Storage.....	2-41

3.	Storage Current State.....	2-42
a.	Aboveground Storage.....	2-43
b.	Liquefied Natural Gas Terminals.....	2-46
c.	Trucks and Rail.....	2-47
4.	The Impact of Shale on Natural Gas—Change in Major Flow Patterns.....	2-47
a.	Natural Gas Flows Pre- and Post-Shale.....	2-47
b.	Natural Gas Regional Flow Dynamics.....	2-48
c.	Infrastructure Buildout 2000 to 2008: The Rockies.....	2-49
d.	Infrastructure Development since 2008: The Gulf Coast.....	2-50
e.	Infrastructure Development Since 2008: Appalachia.....	2-51
f.	Appalachia Infrastructure — Ohio to the Gulf Coast.....	2-53
g.	Appalachia Infrastructure — Successful Projects to the East.....	2-54
h.	Infrastructure Buildout Since 2008: Permian Basin.....	2-55
5.	Exports — Natural Gas.....	2-57
a.	Natural Gas Pipeline Exports to Mexico.....	2-57
b.	Natural Gas LNG Exports.....	2-58
6.	Resiliency — Natural Gas Transportation System.....	2-60
a.	Pipelines Resiliency.....	2-60
b.	Vulnerabilities to Damage or Corrosion, Regulatory Oversight.....	2-61
c.	Storage Resiliency.....	2-62
E.	Natural Gas Liquids Infrastructure History and Current State.....	2-63
1.	General Overview of Natural Gas Liquids.....	2-63
2.	General Overview of Processing and Fractionation Systems.....	2-64
a.	Gas Processing.....	2-64
b.	Fractionation Systems.....	2-66
3.	General Overview of NGL Transportation System.....	2-66
a.	NGL Pipelines.....	2-66
b.	NGL Rail.....	2-68
c.	NGL Trucking.....	2-68
d.	NGL Marine.....	2-68
e.	NGL Storage.....	2-68
4.	History and Current State of NGL Transportation.....	2-69
a.	Pre-Shale NGL Y-Grade and Purity Product Pipelines.....	2-70
b.	Natural Gas Liquids Pipelines.....	2-70

c.	Post-Shale NGL Y-Grade and Purity Product Pipelines.....	2-70
d.	Y-Grade, 2012 to 2018.....	2-71
e.	Purity Product Pipeline History, 2012 to 2018.....	2-71
f.	Permian Basin NGL Pipelines, 2019 to 2021.....	2-72
g.	Beyond the Permian Basin, 2019 to 2021.....	2-75
5.	Exports – NGLs.....	2-75
6.	Resiliency – NGL Transportation System.....	2-77
a.	Strengths.....	2-77
b.	Exposures.....	2-78
F.	Mobile Transport.....	2-79
1.	Rail Transportation System.....	2-79
2.	Resiliency – Rail.....	2-82
3.	Marine and Waterways Transportation System.....	2-82
4.	Resiliency – Marine.....	2-86
a.	Strengths and Exposures.....	2-87
5.	Trucking Infrastructure.....	2-88
6.	Resiliency – Trucking.....	2-89
III.	Infrastructure Development and Regional Constraints.....	2-89
A.	Basin-Specific Challenges.....	2-89
1.	Permian Basin – Crude Oil, Natural Gas, and NGLs.....	2-90
2.	Appalachia (Marcellus/Utica) – Natural Gas.....	2-90
3.	Appalachia (Marcellus/Utica) – NGLs.....	2-91
4.	Bakken – Crude Oil.....	2-92
5.	Flaring and Infrastructure Constraints.....	2-92
6.	The West Coast (PADD 5).....	2-93
IV.	Interdependencies between Infrastructure Development and Ancillary Markets.....	2-95
A.	Crude Oil Supply and Export Infrastructure.....	2-95
B.	Development Challenges.....	2-95
C.	Crude Oil Exploration and Production.....	2-95
D.	Consumer Transportation and Supply.....	2-96

E. Natural Gas.....	2-96
1. Natural Gas Infrastructure and the Power Sector.....	2-96
a. Overview.....	2-96
b. History.....	2-97
c. Demand for Natural Gas in the Power Sector.....	2-97
d. Evolution of Power Plants.....	2-98
e. Grid Stability.....	2-101
f. Decarbonizing Options — Natural Gas and Power.....	2-101
g. Power Sector Fuel Choice Analysis.....	2-101
h. Summary.....	2-102
2. Natural Gas Infrastructure and the U.S. LNG Export Market.....	2-102
F. New Pipeline Projects.....	2-104
1. Unexpected Delays.....	2-106
2. Pace of Development Critical to Growth and Benefits U.S. Consumers/Economy.....	2-106
V. The Value of Infrastructure.....	2-106
A. Economic Growth.....	2-108
B. Job Creation.....	2-109
C. Stronger Exports.....	2-109
D. Improved Manufacturing Competitiveness.....	2-110
E. Market Efficiency Benefits to Households and Businesses.....	2-112
F. U.S. Energy Prices and Expenditures.....	2-113
G. Electricity.....	2-114
H. Regional and State Level Benefits.....	2-114
1. Texas.....	2-117
2. Virginia.....	2-117
3. Pennsylvania.....	2-117
4. Appalachia: The Connective Potential of Infrastructure: Appalachian Petrochemicals.....	2-118
5. North Dakota: Value of Infrastructure in Connecting Resources to Markets.....	2-122
6. Alaska Spotlight: Connecting Resources to Markets.....	2-125
7. Permian Basin Infrastructure Constraints.....	2-127
I. Findings and Recommendations.....	2-127

VI. Summary of Findings and Recommendations.....2-129

Chapter Three: Permitting, Siting, and Community Engagement for Infrastructure Development

I. Introduction.....3-1

II. Regulatory Framework for Energy Transportation Infrastructure.....3-3

A. Cooperative Federalism.....3-4

B. Federal Laws.....3-5

1. NEPA: The Magna Carta of Federal Environmental Laws.....3-5

2. Federal Agency Lead Differs by Mode, Transported Product, and Regulated Activity...3-19

3. Multiple Agencies Participate in Review Processes.....3-20

a. Single Statute Gives Oversight to Multiple Agencies.....3-20

b. Multiple Statutes Convey Overlapping Oversight.....3-23

c. Greater Focus on and Adherence to Interagency Coordination.....3-26

4. Agencies Have Multiple Interests.....3-27

C. States’ Role in Regulating Oil and Natural Gas Transportation Infrastructure.....3-29

1. State Role in the Absence of Federal Law.....3-30

2. State Roles Through Consultation or Delegation of Authority.....3-33

3. State Environmental Policy Acts.....3-33

D. County and Municipal Roles.....3-36

E. Examples of Energy Infrastructure Projects Delayed, Denied, or Cancelled.....3-41

F. American Indians and Alaska Natives.....3-43

III. Public Engagement for Infrastructure Projects.....3-45

A. Soliciting Public Input to the Regulatory Process.....3-47

B. Engagement with Community and Stakeholders.....3-50

1. Community Engagement.....3-50

C. Stakeholder Feedback.....3-51

1. Environment, Public Health, and Safety Concerns.....3-52

a. Public Health and Safety.....3-52

b. Air and Water Quality.....3-53

c. Noise and Vibration.....3-53

d. Wildlife and Vegetation.....3-53

e. The Relationship Between Climate Change, NEPA, and Litigation.....3-56

2. Environmental Justice.....	3-63
3. Economic Interests and Skilled Labor Need.....	3-63
4. Eminent Domain.....	3-66
5. Historical and Cultural Preservation.....	3-68
D. American Indians and Alaska Natives and Government-to-Government Consultation.....	3-68
1. Overlooked Workforce Development.....	3-69
2. American Indians, Alaska Natives, Labor Union, and Federal Government Collaboration and Training.....	3-69
3. Avoiding Tribal Siting.....	3-70
4. Siting and Sacred Sites.....	3-71
5. Arms-Length Negotiations.....	3-71
6. Complex and Nebulous Permitting Framework.....	3-71
7. Lack of Consultation Requirements in Proceedings.....	3-71
8. Climate Change.....	3-71
E. Best Practices for Stakeholder Engagement.....	3-72
IV. Permitting Processes by Mode and Activity.....	3-75
A. Siting and Permitting Processes by Mode.....	3-75
1. Pipelines.....	3-75
a. Interstate Natural Gas.....	3-75
b. Liquid and Intrastate Natural Gas Pipelines.....	3-79
c. Cross Border Permits.....	3-79
2. Inland Waterways and Port Facilities.....	3-80
a. Deepwater Ports.....	3-81
3. LNG Infrastructure.....	3-83
a. FERC’s Process for Reviewing Applications for LNG Terminals.....	3-83
b. Other Environmental Permits for LNG Terminals.....	3-85
4. Aboveground Storage.....	3-85
5. Underground Storage.....	3-85
a. Natural Gas.....	3-85
b. Liquids Storage.....	3-89
6. Rail.....	3-89
7. Truck.....	3-90

B. Construction, Operations, and Maintenance.....	3-91
1. Interstate and Intrastate Pipelines.....	3-91
2. LNG Storage.....	3-92
3. Rail.....	3-94
4. Trucks.....	3-94
5. Marine.....	3-94
V. Reform Efforts.....	3-95
A. The Urgency of Siting and Permitting Reforms.....	3-95
B. Recent Legislative Efforts for Regulatory Reform.....	3-97
1. FAST-41.....	3-97
2. Litigation Cycle Reform.....	3-99
C. Executive Orders.....	3-100
1. Executive Order 13807: Establishing Discipline and Accountability in the Environmental Review and Permitting Process for Infrastructure Projects (One Federal Decision).....	3-100
2. Executive Order 13868: Promoting Energy Infrastructure and Economic Growth.....	3-101
D. Agency Staffing and Training.....	3-101
VI. Summary of Findings and Recommendations.....	3-103

Chapter Four: Technology Advancement and Deployment

I. Technology Advancement and Deployment Overview.....	4-1
A. Introduction.....	4-1
B. Scope of the Study.....	4-1
C. Industry Safety and Environmental Performance Trends.....	4-2
1. Oil and Natural Gas Transportation Workplace Safety.....	4-2
2. Crude Oil Transportation Spill Performance by Rail, Truck, Marine, and Pipeline.....	4-2
D. Industry and Government Research, Development, and Deployment.....	4-3
1. Research and Development Overview.....	4-3
2. Pipeline Industry’s Role in R&D.....	4-4
3. Government’s Role in R&D.....	4-6
a. Oil and Natural Gas Pipelines.....	4-6
b. Surface Transportation.....	4-7

4. Academic Collaboration—Competitive Academic Agreement Program.....	4-8
5. Technology Advancement and Deployment Challenges.....	4-8
II. Pipeline and Storage Industry Technologies.....	4-10
A. Pipeline Industry Overview.....	4-10
B. Pipeline Asset Integrity.....	4-15
1. Asset Integrity Overview.....	4-15
2. Inspections and Feature Detection.....	4-19
3. Enhancing Regulator and Industry Collaboration.....	4-22
a. Regulatory Pathways.....	4-23
b. Industry Collaboration on Safety.....	4-24
C. Pipeline Operations Integrity.....	4-24
1. Operations Integrity Overview.....	4-24
a. Technology Focus Areas.....	4-25
b. Deployment Challenges.....	4-25
2. Leak Detection Technologies.....	4-26
3. Geological Hazard Monitoring Technologies.....	4-30
4. Remote Sensing Technologies and Geospatial Analytics.....	4-32
a. Overview.....	4-32
b. Remote Sensing.....	4-32
c. Geospatial Analytics.....	4-35
d. Applications by Platform.....	4-36
D. Pipeline Construction and Maintenance.....	4-36
1. Construction and Maintenance Overview.....	4-36
2. Prevention of Pipeline Corrosion Failures.....	4-37
3. Improvements to High-Strength Steels and Welding to Reduce Material Pipe/Weld Failures.....	4-38
4. Improved Field Inspection Technologies to Reduce Material Pipe/Weld Failures.....	4-39
5. Assurance of Long-Term Pipeline Repair Integrity to Protect Against Corrosion and Material/Weld Failures.....	4-40
6. Locating Underground Utilities to Prevent Excavation-Caused Incidents.....	4-42
E. Pipeline Storage Facilities.....	4-44
1. Underground Storage of Gas.....	4-44
a. Underground Storage Overview.....	4-44

b.	Underground Storage Reservoir Well and Reservoir Design and Integrity Management.....	4-45
c.	Solution-Mined Cavern Design and Integrity Management.....	4-47
2.	Aboveground Storage of Oil and Liquids.....	4-47
a.	Aboveground Storage Overview.....	4-47
b.	Sensors.....	4-48
c.	Firefighting Foams.....	4-48
F.	Pipeline Methane Emissions.....	4-49
1.	Pipeline Methane Emissions Overview.....	4-49
2.	Reducing Compressor Station Leaks.....	4-50
3.	Reducing Uncombusted Methane Fuel Gas from Reciprocating Engines (Methane Slip).....	4-52
4.	Reducing Methane Emissions from Planned Pipeline Blowdowns.....	4-55
III.	Surface Modes of Transportation.....	4-56
A.	Liquefied Natural Gas Transportation.....	4-56
1.	LNG Industry Overview.....	4-56
2.	Onshore LNG Storage and Containment Integrity.....	4-57
3.	LNG Maritime Shipping.....	4-60
a.	Overview.....	4-60
b.	LNG Shipping in the United States.....	4-60
c.	LNG Transfer Technologies.....	4-61
B.	Marine Industry Technologies.....	4-63
1.	Marine Industry Overview.....	4-63
2.	Navigational Technologies to Address Human Factors.....	4-66
3.	Training and Development to Reduce Accidents Caused by Human Factors.....	4-68
a.	Existing Navigational Technologies.....	4-69
C.	Rail Industry Technologies.....	4-75
1.	Rail Industry Overview.....	4-75
a.	Construction and Maintenance.....	4-78
b.	Asset Integrity.....	4-79
2.	Equipment.....	4-80
a.	Construction and Maintenance.....	4-80
b.	Asset Integrity.....	4-83

3.	Train Operation Safety.....	4-83
a.	Train Control Technology.....	4-83
b.	Locomotive Cab Technologies.....	4-85
c.	Route Modeling.....	4-85
4.	Emergency Response.....	4-86
D.	Trucking Industry Technologies.....	4-86
1.	Trucking Industry Overview.....	4-86
a.	Types of Safety Systems.....	4-88
b.	Challenges of Translating Safety Technologies from Passenger Cars to Large Commercial Trucks.....	4-88
c.	Enabling Technology Implementation in Trucking Industry.....	4-88
d.	Data Collection and Sharing.....	4-89
2.	Forward Collision Warning and Avoidance Systems.....	4-89
3.	Lane Departure Warning and Corrective Steering.....	4-92
4.	Fatigue and Distracted Behavior Recognition.....	4-93
5.	Vehicle Camera Systems.....	4-94
IV.	Cybersecurity.....	4-94
A.	Overview of Operational Technology and Cybersecurity.....	4-95
1.	Growing Nature of OT Cybersecurity Risks.....	4-96
a.	Historical Protections.....	4-97
b.	Erosion of Isolation and Increased Reliance on Segmentation.....	4-97
c.	Challenges to Protecting OT.....	4-99
d.	OT Cyber Threats May Interfere with Safety System Protections.....	4-99
e.	Growing Threat of OT Cyberattacks.....	4-100
f.	Sophisticated and Organized Threat Actors.....	4-100
g.	Mechanisms of Exploitation.....	4-103
2.	Industry Response to Evolving Threats.....	4-105
B.	Improving Cybersecurity for the Oil and Natural Gas Industry.....	4-106
1.	Improvement of Cyber Management Programs.....	4-106
a.	Inventory and Asset Management.....	4-107
b.	Vulnerability Analysis and Threat Monitoring.....	4-108
c.	Management of Change and Change Detection.....	4-108
d.	Reducing Threats and Vulnerabilities.....	4-109
e.	Incident Response, Recovery, and Investigation.....	4-109
f.	Improving the Partnership between IT and OT Professionals.....	4-110

- 2. Improving Collaboration with Key Stakeholders.....4-111
- 3. Advancing Cybersecurity R&D within the Oil and Natural Gas Industry.....4-115
- C. Cybersecurity Conclusion.....4-115
- V. Summary of Findings and Recommendations.....4-117**
- VI. Definitions and Background Information.....4-129**
- A. Terms and Definitions.....4-129
- B. API 1164.....4-130
- C. Key Cybersecurity Report References.....4-130

Appendices

- Appendix A: Request Letter and Description of the NPC.....A-1
- Appendix B: Study Group Rosters.....B-1
- Appendix C: List of Topic Papers.....C-1
