U. S. DEPARTMENT OF ENERGY, OFFICE OF SCIENCE INTEGRATED SUPPORT CENTER—CHICAGO OFFICE

NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) ENVIRONMENTAL EVALUATION NOTIFICATION FORM

To be completed by "Applicant," i.e., organization with responsibilities for a "Federal action" involving application to DOE for a permit, license, exemption or allocation, or other similar actions. For assistance with this Form, refer to "Instructions for Preparing ISC-CH F-560, Environmental Evaluation Notification Form."

Solicitation/Award No. (if applicable): DE-SC0023310

Organization Name: Clemson University

Proposed Action Title: Improving models of stand and watershed carbon and water fluxes with more accurate representations of soil-plant-water dynamics in southern pine ecosystems

Total DOE Funding/Total Funding: \$360,335.00

I. <u>Project Description</u>: (Use explanation pages if additional space is required)

A. <u>Proposed Project/Action (if applicable, delineate Federally funded/Non-Federally funded portions)</u>

This project involves outdoor field work and computer modeling to study the way trees regulate their own water budget. Outdoor work involves adding probes to measure water use in trees, adding sensors to measure soil moisture, and sensors to measure land to air fluxes of water vapor and carbon dioxide.

B. <u>Would the project proceed without Federal funding?</u>

If "yes," use explanation page.

II. <u>Description of Affected Environment</u>: (Use explanation pages if additional space is required)

Work will take place on private land, a property called Hobcaw Barony, owned by the Belle W. Baruch Foundation, who has a memorandum of understanding with Clemson University (lead PI organization) to conduct research on the property. Work is minimally invasive to the environment, and includes digging small holes in the ground and installing sensors in the forest. Much of the infrastructure is already in place prior to this project. None of the modifications are permanent.
