---

Good morning FERGAS Team,

Following a conversation with your Division, I have edited Appendix C of Otter Industries LLC's Application to show 36 potential liquefaction plants from which we hope to source LNG for export. There were originally 37 plants requested, including one plant which had incomplete information, which has now been removed.

Kindly acknowledge receipt and please let me know if you have any questions.

All my best,  
Adam

Hello Adam,

Thank you so much for your email. Your application is still under review and the status has not changed since our last communication. You can view your application and the docket for this proceeding on DOE's website here: [Otter Industries LLC - FECM Docket No. 22-123-LNG | Department of Energy](#). As you mentioned, the review process for this type of application is typically 90-120 days and can be a bit longer or shorter depending on what other requests are being managed by the office. We don't have any concerns with your application at this time, but will certainly be in touch if any questions or issues arise. Please let us know if you have any additional questions and feel free to give me a call if you'd like to discuss further.

Best,  
Jennifer

Good morning FERGAS Team!

This is Adam Pollack, Founder of the Otter Company. I just wanted to gently check in and see if there might be any update on the status of the application. I understand that the waiting period can be up to 90 days (assuming the application is valid) but wanted to reach out nonetheless as we have a few prospects I'd love to investigate if the timing made sense.

Thank you as always for being a resource.

Warmly,  
Adam

To Whom This may Concern,

Attached please find an export application for authorization to export small

scale LNG volumes to FTA and Non FTA countries. Please disregard my prior email where I did not include proof of the \$50,000 payment (please see attached).

Thank you in advance for your consideration.

All my best,  
Adam Pollack  
Founder, The Otter Company
