

State Energy Security Action List

Short Term	What	Why	Completed
	Sign-up for EAGLE-I account and familiarize yourself with the tool	Real-time situational awareness allows you to monitor and report outages and help coordinate response and recovery.	
	Ensure your office has an Energy Emergency Assurance Coordinator (EEAC). Register EEAC in ISERNet	EEACs are individuals designated by the state or territory as points of contact for DOE and other states. Enables information sharing and collaboration leading up to and during energy disruptions and emergencies.	
	Bookmark DOE's Energy Waiver Library	During emergencies, waivers are often used to expedite restoration. DOE created an online library for common waivers and special permits used for energy response.	
	Bookmark CESER's SLTT Resource Library	CESER's online SLTT Library provides SLTT partner tools, trainings, analysis, guides, and other energy security resources.	
Long Term	What	Why	Completed
	Update State Energy Security Plans (SESPs)	Energy security planning aims to ensure a reliable and resilient supply of energy through efforts to identify, assess, and mitigate risks to energy infrastructure and to plan for, respond to and recover from events that disrupt energy supply. Check out CESER's SESP Resource Hub .	
	Actively participate in exercises, capture areas of improvement, and implement	Exercises can be used to review and test state emergency response activities in a simulated environment.	
	Review your state's emergency authorities and mutual assistance processes	Understand your state's EMAC process and National Guard capabilities to be better prepared to respond to an energy emergency.	
	Clarify state agency roles and responsibilities for cybersecurity	Cybersecurity is part of all-hazard energy security planning. Collaborate across your state's: Public Utility Commission, Emergency Management Agency, Fusion Center, and with your Homeland Security Advisor and Information Security Officer.	
	Visit CESER Website and Hurricane Hub for DOE Situation Reports	CESER posts public situation reports on this website during significant energy emergencies.
