

Ambitions and challenges in delivering on plastics and waste commitments

Transitioning to a Sustainable, Circular Economy for Plastics
Workshop - June 8th 2023
Nicholas Vijverman - nicholas.vijverman@emf.org

Our mission

will always be...

**TO ACCELERATE THE
TRANSITION TO A
CIRCULAR ECONOMY**

**1/3 of plastic packaging leaks
into the environment**

ELIMINATE

INNOVATE

CIRCULATE

Targets of the Global Commitment

Key lessons learnt since 2018

**Please consult the annual Global
Commitment Progress Report, to be
published on October 31st 2023.**

Focus areas in transitioning to a circular economy for plastics

Reuse models present an untapped opportunity to reduce the need for plastic

A faded, grayscale background image of a young girl in a dark dress reaching up towards a red heart-shaped balloon. The scene is set outdoors with a utility box visible on the right side. The text is overlaid in the center of the image.

**Believe in a 2030 without plastic pollution, even
if it means letting go of your traditional
packaging supply chain**
