## **Categorical Exclusion Determination**

Western Area Power Administration
Department of Energy

**<u>Proposed Action</u>**: Trinity-Weaverville, -Carr, and Lewiston Tap Off ROW Tree Removal

Project No.: 100153025

**Project Manager:** Ricardo Velarde

Location: Trinity County, CA

Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021): B1.3 Routine maintenance

### **Description of the Proposed Action:**

Western Area Power Administration, Sierra Nevada Region (WAPA) is responsible for the operation and maintenance of several federally owned and operated transmission lines throughout California, including Trinity Weaverville 60-kV (TNI-WEA), Lewiston Tap 60-kV (LWN-LWNT), and Trinity Carr 230-kV (TNY-CAR), located in Trinity County. This responsibility includes ensuring WAPA maintains reliable access to transmission towers and other facilities to comply with the National Electric Safety Code, Western States Coordinating Council, and WAPA directives for protecting human safety and maintaining the reliable operation of the transmission system.

WAPA proposes to remove up to 282 trees outside the TNI-WEA, LWN-LWNT, and TNY-CAR rights-of-way (ROWs). The land is owned by U.S. Forest Service, Bureau of Land Management, and private landowners. The hazard trees are located outside but adjacent to the right-of-way (off-ROW) and have the potential to fall on, grow into, or otherwise compromise the integrity of the transmission lines. WAPA Order 450.3A dictates the removal of hazard trees in compliance with the North American Electric Reliability Council (NERC) Standard FAC-003-1. WAPA has limited discretion on the removal of trees that meet hazard standards. Trees will be felled and left on site, limbs will be chipped and broadcast, and lop and scatter debris will not exceed 12 inches in height. Trees will be removed in late 2023 outside of northern spotted owl breeding and nesting season. Cultural resources will be flagged and avoided by using hand tools only and no ground disturbance.

### **Findings:**

In accordance with Section 1021.410(b) of the Department of Energy's (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, Jul. 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011), WAPA has determined that the proposed action:

- (1) fits within a class of actions listed in Appendix B of 10 CFR 1021, Subpart D (see attached Environmental Checklist);
- (2) does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal; and
- (3) has not been segmented to meet the definition of a categorical exclusion.

Based on these determinations, WAPA finds that the proposed action is categorically excluded from further NEPA review.

# **Categorical Exclusion Environmental Checklist**

This checklist documents environmental considerations for the proposed project and explains why the project would not have the potential to cause significant impacts on environmentally sensitive resources and would meet other integral elements of the applied categorical exclusion.

**Proposed Action:** Trinity-Weaverville, -Carr, and Lewiston Tap Off ROW Tree Removal 2023

### **Project Site Description**

The proposed project area is in Trinity County, California. Land is owned by U.S Forest Service, Bureau of Land Management, and private landowners.

The dominant habitat at this site consists of terrestrial habitat plant types including mixed conifer, oak, and montane white alder. The project area also includes some montane riparian areas, though tree removal activity will avoid impact to riparian areas.

Equipment staging areas would be on roads and within the ROW whenever possible.

### **Evaluation of Potential Impacts to Environmental Resources**

Environmental Resource Impacts	No Potential for Significance	No Potential for Significance, with Conditions	
Historic and Cultural Resources     Explanation:		<b>/</b>	
Most of the areas around the off-ROW trees hav 4 significant cultural sites and 3 unevaluated site 4 cultural sites were identified within the project No vehicles or heavy equipment will be allowed line project area.	es were identified within the pr area. These sites will be flagg	oject area. Within the TNY-CAR line ed and hand tools only will be used.	

2.	Geology and Soils <u>Explanation:</u>	<b>✓</b>	
	Ground disturbance is not anticipated in this project; therefore	e, no impacts would occur.
