**Re: Docket No. 23-87-LNG  
Lake Charles Exports, LLC Application**

Dear Mrs. Sweeney:

Lake Area Industry Alliance (LAIA) is an organization that began in 2000 and represents two dozen manufacturing facilities in SW Louisiana which include refineries, chemical manufacturers, LNG export facilities and other industrial supportive facilities with over 8,000 direct employees. I serve as the Executive Director of LAIA and on behalf of our membership, I am writing to express our full and complete support for Lake Charles Exports, LLC's new application for long-term authorization to export LNG to non-Free Trade Agreement countries, and request for expedited consideration, from the existing Lake Charles Terminal. It is vital for the economic well-being of SW Louisiana, the entire state of Louisiana, and the country as a whole that the Department of Energy approve Lake Charles Exports application as soon as possible.

This project will have a significant positive impact on job creation and economic output of our region for the state of Louisiana over the multiple year construction period. It is our understanding that there will be nearly 3,000 estimated construction jobs during peak construction and billions of dollars of overall construction expenditures. And, once completed, the project will generate hundreds of high-quality jobs for the region related to LNG operations, and ancillary services. The export of LNG from the existing Lake Charles Terminal will provide a much-needed boost to Louisiana's local and regional economy through resource development, an enhanced property and sales tax base, direct and indirect job creation and overall economic activity.

Our members, their families and the state of Louisiana will benefit greatly by the creation of these high paying jobs attributable to the Lake Charles LNG project. Although new jobs are first and foremost, us Louisianans also love our state and all its natural beauty. Given that the Lake Charles LNG export facility will utilize significant existing infrastructure at the Lake Charles Terminal, environmental impacts from the construction of the export facility will be limited.

We are aware of the extensive environmental review already completed by the Department of Energy and the Federal Energy Regulatory Commission. These stewards of the environment have concluded that this project complies with applicable Federal environmental laws and that, taking into account the environmental conditions that Lake Charles Exports has agreed to follow, this project will satisfy acceptable and prudent environmental standards.

I strongly encourage you to approve Lake Charles Exports application as soon as possible in order to allow this long overdue project to proceed and benefit our community. Thank you for your attention to this matter.

I can be reached at [jrock@laia.com](mailto:jrock@laia.com) to respond to any questions concerning this request.

Thank you for your time and consideration.

Sincerely,

Jim Rock

Executive Director

Lake Area Industry Alliance
