ATTN: Mrs. Amy Sweeney, Director

RE: Docket No. 23-87-LNG
Lake Charles Exports, LLC Application

Dear Mrs. Sweeney:

I have prepared this letter to express our support and approval of Lake Charles Exports, LLC Application for Long-Term Authorization to Export Liquefied Natural Gas to Non-Free trade Agreement Nations. It is requested that the U.S. DOE conduct its' due diligence promptly and submit their approval, as soon as possible, for the Lake Charles, La. Terminal Facility.

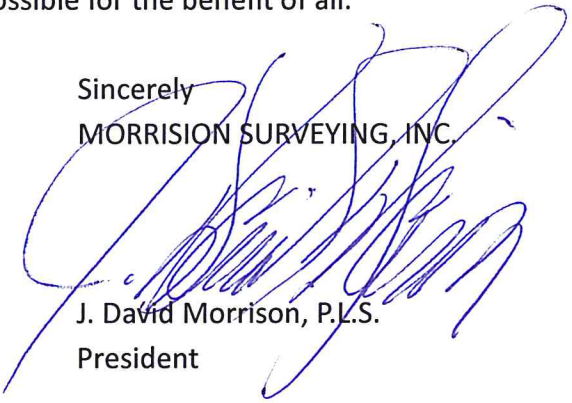

A significant amount of pre-planning has been conducted with the desire that the U.S. DOE will approve the request allowing for this extremely viable project in the Lake Charles, La. area. The LNG Export Facility will utilize existing infrastructure at the Lake Charles Terminal lessening the environmental impact on land and water. It is inspiring to know the amount of environmental review that has been conducted by the Department of Energy and the Federal Energy Commission. These Managers of the environment have determined that the project complies with applicable Federal environment laws and that this project will satisfy acceptable and prudent environmental standards taking into account, the environmental conditions that Lake Charles Exports has agreed to comply with.

This project will have a significant impact on economy not only in the local area but, State, Nation and Worldwide. This project will create 1000's of jobs during construction and hundreds of high- quality jobs upon completion. Not only will there be local jobs created at the facility it will affect other crafts as well creating jobs for Auxillary Services, Engineering, Waterborne Operations, Lodging, Restaurants. In addition, it will also create an enhanced tax base for local, state, regional and national agencies. Last but certainly not least, Louisianans will have another major reason to remain within this beautiful State, to raise their families and be proud of what they have worked so hard to obtain.

I encourage the Department of Energy to approve Lake Charles Exports Application as soon as possible to allow the project to proceed as soon as possible for the benefit of all.

Sincerely

MORRISON SURVEYING, INC.

J. David Morrison, P.L.S.

President
