CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide funding to the City of Albany, California to develop and host community outreach and education events regarding energy efficiency, electric appliances, and gas line decommissioning. Additionally, several individual homes throughout the city would receive energy assessments and customized electrification recommendations.

Community outreach and education activities would involve the development of educational outreach materials and content, hosting outreach events, hiring consultants, conducting surveys, data analysis, reporting, and dissemination of information. The energy assessments would involve building audits, collecting data, recommending possible electrification options, theoretical project planning and pricing, and holding meetings. No physical modifications would occur to any structures as a result of award activities.

The City of Albany would observe all applicable federal, state, and local regulations and requirements. DOE does not anticipate any impacts to resources of concern due to the proposed activities of the project.
