**Re: Energía Costa Azul, S. de R.L. de C.V.
ECA Large-Scale Project
DOE/FECM Order Nos. 4318, 4365
FE Docket No. 18-145-LNG
Semi-Annual Report**

Dear FERC Staff,

On January 25, 2019, in DOE/FECM Order No. 4318, the U.S. Department of Energy, Office of Fossil Energy and Carbon Management (“DOE/FECM”), granted to Energía Costa Azul, S. de R.L. de C.V. (“ECA”) a long-term, multi-contract authorization to export natural gas to Mexico and to re-export liquefied natural gas (“LNG”) from its proposed ECA Large-Scale Project to nations that have free trade agreements with the United States requiring national treatment in the trade of natural gas (“FTA countries”). On March 29, 2019, in DOE/FECM Order No. 4365, the DOE/FECM granted to ECA a long-term, multi-contract authorization to export natural gas to Mexico and to re-export LNG from the ECA Large-Scale Project to Non-FTA countries. On December 10, 2020, in DOE/FECM Order Nos. 4318-A and 4365-A, the DOE/FECM granted to ECA an extension of the export term for authorizations to free trade agreement and non-free trade agreement nations through December 31, 2050. On June 11, 2021, in DOE/FECM Order No. 4318-B, the DOE/FECM granted to ECA a long-term, multi-contract authorization to export additional volumes of natural gas to Mexico and to re-export LNG from the ECA Large-Scale Project to FTA countries. On July 12, 2022, the DOE/FECM issued a Notice of Environmental Assessment. On December 20, 2022, in DOE/FECM Order No. 4365-B, the DOE/FECM granted to ECA an authorization to export

Energía Costa Azul, S. de R.L. de C.V.
Semi-Annual Report
FE Docket No. 18-145-LNG

additional volumes of natural gas to Mexico and to re-export LNG from the ECA Large-Scale Project to Non-FTA Countries. One of the conditions of the DOE/FECM's authorizations is that ECA file semi-annual written reports (on or before April 1 and October 1 of each year) describing the progress of the planned ECA Large-Scale Project. ECA hereby submits the semi-annual report covering the period ending March 31, 2024.

ECA continues to work to assess the permitting authorizations to export natural gas, consistent with the DOE/FECM and the regulatory agencies in Mexico. ECA is currently in the stage of analyzing the different technical configurations and operational alternatives to find the most suitable options for the ECA Large-Scale Project. Additionally, ECA began discussions to assess the natural gas supply and transportation alternatives with different counterparties considering potential routes and volumes required. ECA still estimates that the ECA Large Scale Project could begin exports as soon as 2029.

Please contact me with any questions regarding this filing.

Respectfully submitted,

/s/ Jerrod L. Harrison
