

Hurricane Milton

Situation Report #3 | Saturday, October 12, 2024 | 4:00 PM EDT

REPORT DISTRIBUTION:

Public

EXECUTIVE SUMMARY

Incident Summary

Hurricane Milton made landfall near Siesta Key, FL around 8:30 PM EDT, October 9, as a Category 3 storm. Milton brought hurricane force winds to most of central Florida, including the Tampa, Orlando, and Canaveral metropolitan areas. Milton weakened as it crossed the state, emerging over the Atlantic Ocean as a Category 1 storm. Hurricane Milton caused widespread disruption to energy infrastructure across the state.

Electricity Sector Summary

- As of 3:00 PM EDT, October 12, there are approximately 1.39 million customer power outages in Florida (12.5% of all customers), down from a peak of 3.4 million on October 10.
- Utilities continue to assess damage and restore power as conditions permit.
- Estimated times of restoration have started to be published.
- Utilities in Florida made preparations prior to Milton. More than 50,000 workers from at least 42 states, the District of Columbia, and Canada are dedicated to the Milton response and restoration effort and were strategically prepositioned in and near Florida before Hurricane Milton made landfall.

Oil and Natural Gas Sector Summary

- The ports of Tampa and Manatee, which supply most of the fuel in the Tampa and Orlando areas are open with restrictions. All other Florida ports are fully open. The Port of Tampa expects to begin receiving vessels on October 12, the first of which will be carrying petroleum products.
- All fuel terminals at the Port of Tampa had been restored to grid power and are expected to begin operations once safety checks are complete.
- There are no identified regional fuel supply issues in the state. Outages at retail stations have been reported in some regions of Florida due to increased demand and power outages. However, state and federal partners have taken action to facilitate fuel supply into and within the state and are working with industry to ensure fuel is available, especially for response operations.

Hurricane Milton Customer Power Outages

As of 3:00 PM EDT 10/12/24

State	Current Outages	% State Without Power	Peak Storm Outages	% Restored from Peak
Florida	1,389,000	12.5%	3,314,542	59%

Emergency Declarations and Waivers

To provide vital supplies and transportation services to a disaster area in the United States, emergency declarations may be issued by the President, Governors of States, or the Federal Motor Carrier Safety Administration (FMCSA). These declarations trigger the temporary suspension of certain Federal safety regulations, including Hours of Service, for motor carriers and drivers engaged in specific aspects of the emergency relief effort. See [49 CFR 390.23](#) for the actual emergency regulation.

Emergency Declarations and Hours of Service Transportation Waivers				
As of 3:00 PM EDT 10/11/2024				
State/Territory	Details	Effective Dates		Status
		Start	End
