

MASSACHUSETTS FACT

President Biden's Investing in America Agenda: Growth in Jobs, Boon in Investments, and Boost in Savings

Growing Good-Paying Jobs

We are starting to see a burst of domestic job growth, manufacturing expansion, and savings for businesses thanks to President Biden's Investing in America Agenda.

The energy sector already in 2023 employed **174,900 Massachusetts workers**. The clean energy workforce

especially will be turbo-charged with an estimated **\$11.4 billion of investment in large-scale clean power generation** and storage in Massachusetts between now and 2030.

Massachusetts is home to **697,600 small businesses**, representing 99.5%

of businesses and 45% of workers in the state—and they will save money thanks to the Investing in

America Agenda. Commercial building owners can receive a tax credit up to \$5 per square foot

to support energy efficiency improvements that deliver lower utility bills. And small businesses also can receive tax credits covering up to 30% of the costs of installing low-cost solar power and of purchasing clean trucks and vans for commercial fleets.

Bringing Manufacturing Back to America

Thanks to President Biden's Investing in America Agenda, there's a clean energy boon happening from coast to coast – offering communities good-paying jobs, lower costs, and an expanded and reliable energy grid.

As of August 2024, there's already **3.6 GW of solar, wind, and storage**

capacity in Massachusetts – and there is 50 MW of planned additional clean energy capacity in the works, enough to power the equivalent of 6,100 additional homes. On top of this, the **costs of solar and wind power are projected to drop by 23% and 35%**, respectively, over the next 30 years in Massachusetts.

Since January 2021, the private sector has announced more than **\$220 billion in clean energy**

manufacturing investments in new or expanded facilities in more than 47 U.S. states, demonstrating a renaissance in domestic manufacturing and jobs. For more information, see www.energy.gov/invest.

Bidenomics = Savings for Consumers

Thanks to savings on utility and transportation costs, Americans will have more money in their pockets each month.

Since 2015, **8,220 homes in Massachusetts** have

benefitted from reduced energy costs and improved health and safety thanks to the \$76 million in funding from the Energy Department's Weatherization Assistance Program and State Energy Program – **leading to 750 jobs.**

Low-income households in **Massachusetts could save on average 44% on home energy**

bills when they upgrade their energy efficiency. Massachusetts Households will get support for these types of upgrades to the tune of **\$146 million through DOE's Home Energy Rebate programs.**

The Inflation Reduction Act will help more families never pay at the pump again, with tax credits for eligible

buyers and eligible vehicles of up to \$7,500 for new electric vehicles and up to \$4,000 for used electric vehicles – **saving families an average of \$950 a year** on fuel and maintenance costs.■
