President Biden's Investing in America Agenda: Growth in Jobs, Boon in Investments, and Boost in Savings

Growing Good–Paying Jobs

We are starting to see a burst of domestic job growth, manufacturing expansion, and savings for businesses thanks to President Biden's Investing in America Agenda.

The energy sector already in 2023 employed **57,300 Nebraska workers.**

The clean energy workforce especially will be turbo-charged with an estimated **\$24.5 billion of investment in large-scale clean power generation** and storage in Nebraska between now and 2030.

Nebraska is home to **181,700 small businesses**, representing 99.1% of businesses and

48% of workers in the state—and they will save money thanks to the Investing in America Agenda.

Commercial building owners can receive a tax credit up to \$5 per square foot to support energy efficiency improvements that deliver lower utility bills. And small businesses also can receive tax credits covering up to 30% of the costs of installing low-cost solar power and of purchasing clean trucks and vans for commercial fleets.

Bringing Manufacturing Back to America

Thanks to President Biden's Investing in America Agenda, there's a clean energy boon happening from coast to coast – offering communities good-paying jobs, lower costs, and an expanded and reliable energy grid.

As of August 2024, there's already **3.7 GW of solar, wind, and storage**

capacity in Nebraska – and there is 570 MW of planned additional clean energy capacity in the works, enough to power the equivalent of 72,600 additional homes. On top of this, the **costs of solar and wind power are projected to drop by 23% and 32%**, respectively, over the next 30 years in Nebraska.

Since January 2021, the private sector has announced more than **\$220 billion in clean energy manufacturing**

investments in new or expanded facilities in more than 47 U.S. states, demonstrating a renaissance in domestic manufacturing and jobs. For more information, see www.energy.gov/invest.

Bidenomics = Savings for Consumers

Thanks to savings on utility and transportation costs, Americans will have more money in their pockets each month.

Since 2015, **1,650 homes in Nebraska** have benefitted

from reduced energy costs and improved health and safety thanks to the \$31 million in funding from the Energy Department's Weatherization Assistance Program and State Energy Program – **leading to 410 jobs.**

Low-income households in **Nebraska could save on average 38% on home energy bills** when they upgrade

their energy efficiency. Nebraska Households will get support for these types of upgrades to the tune of **\$91 million through DOE's Home Energy Rebate programs.**

The Inflation Reduction Act will help more families never pay at the pump again, with tax credits for eligible buyers and eligible vehicles of up to

\$7,500 for new electric vehicles and up to \$4,000 for used electric vehicles – **saving families an average of \$950 a year on fuel and maintenance costs.**■
