

# NEW YORK FACT SHEET

## *President Biden's Investing in America Agenda: Growth in Jobs, Boon in Investments, and Boost in Savings*

### **Growing Good–Paying Jobs**

We are starting to see a burst of domestic job growth, manufacturing expansion, and savings for businesses thanks to President Biden's Investing in America Agenda.

The energy sector already in 2023 employed **325,700 New York workers**. The clean energy workforce especially will be turbo-charged with an estimated **\$34 billion of investment in large-scale clean power generation** and storage in New York between now and 2030.

New York is home to **2,200,000 small businesses**, representing 99.8% of businesses and 47% of workers in the state—and they will save money thanks to the Investing in America Agenda.

Commercial building owners can receive a tax credit up to \$5 per square foot to support energy efficiency improvements that deliver lower utility bills. And small businesses also can receive tax credits covering up to 30% of the costs of installing low-cost solar power and of purchasing clean trucks and vans for commercial fleets.

### **Bringing Manufacturing Back to America**

Thanks to President Biden's Investing in America Agenda, there's a clean energy boon happening from coast to coast – offering communities good-paying jobs, lower costs, and an expanded and reliable energy grid.

As of August 2024, there's already **6.4 GW of solar, wind, and storage**

**capacity in New York** – and there is 4.4 GW of planned additional clean energy capacity in the works, enough to power the equivalent of 521,300 additional homes. On top of this, the **costs of solar and wind power are projected to drop by 23% and 35%**, respectively, over the next 30 years in New York.

Since January 2021, the private sector has announced more than **\$220 billion in clean energy manufacturing**

**investments** in new or expanded facilities in more than 47 U.S. states, demonstrating a renaissance in domestic manufacturing and jobs. For more information, see [www.energy.gov/invest](http://www.energy.gov/invest).

## **Bidenomics = Savings for Consumers**

Thanks to savings on utility and transportation costs, Americans will have more money in their pockets each month.

Since 2015, **46,060 homes in New York** have benefitted

from reduced energy costs and improved health and safety thanks to the \$233 million in funding from the Energy Department's Weatherization Assistance Program and State Energy Program – **leading to 1,950 jobs.**

Low-income households in **New York could save on average 41% on home energy bills** when they upgrade

their energy efficiency. New York Households will get support for these types of upgrades to the tune of **\$318 million through DOE's Home Energy Rebate programs.**

The Inflation Reduction Act will help more families never pay at the pump again, with tax credits for eligible buyers and eligible

vehicles of up to \$7,500 for new electric vehicles and up to \$4,000 for used electric vehicles – **saving families an average of \$950 a year on fuel and maintenance costs.** ■
