Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

B5.1 Actions to conserve energy, demonstrate potential energy conservation, and promote energy-efficiency that do not increase the indoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, designers), organizations (such as utilities), and state and local governments. Covered actions include, but are not limited to: programmed lowering of thermostat settings, placement of timers on hot water heaters, installation of solar hot water systems, installation of efficient lighting, improvements in generator efficiency and appliance efficiency ratings, development of energy-efficient manufacturing or industrial practices, and small-scale conservation and renewable energy research and development and pilot projects. The actions could involve building renovations or new structures in commercial, residential, agricultural, or industrial sectors. These actions do not include rulemakings, standard-settings, or proposed DOE legislation.

Rational for determination:

The Forest County Potawatomi Community ("FCPC" or the "Tribe") is deploying a diverse number of "off-the-shelf" renewable energy technologies throughout reservation lands in Forest County, Fond du Lac County and Milwaukee County.

This EF2a NEPA Determination only pertains to the solar PV installation subproject of this grant.

Solar photovoltaic units with a capacity of 18.9 kW will be installed on the Forest County Potawatomi Community Administrative Building in downtown Milwaukee, Wisconsin. The project would not affect any other properties, require disturbing hazardous substances, adversely affect any environmentally sensitive resources, or result in air emissions.
