Subject: I oppose the LNG export proposal
Date: Monday, February 09, 2015 4:25:38 PM

To Whom it may Concern:

I'm strongly opposed to the LNG export proposal. The transport of more and more fossil fuels to be burned in any market - foreign or domestic - is a threat to life as we know it. Methane is a powerful greenhouse gas, and increasing its use by export to foreign markets is not in the public interest. Climate change is a serious public concern now: people are concerned for their and their families' health, safety, and future. We cannot afford to exacerbate climate change in this way.

I and many others have only recently learned about the comment period. Please grant a motion to intervene in these proceedings, so more of the public can have an opportunity to express their deep concerns about this very important matter.

Best regards,

Anne Wright
